March 22, 1993

To All Interested Parties:

On behalf of the California Debt Advisory Commission (CDAC), I am pleased to present *State and Local Tax and Bond Ballot Measures: Results of the 1992 Primary and General Elections*. This report covers the results of the elections held on June 2, 1992 and November 3, 1992. This is the fifth *Elections* report issued by the Commission, but the first one to combine the results of the state's Primary and General Elections.

The report indicates that 19 of 53 tax and bond measures (36 percent) were approved at the June 1992 election, and 35 of the 116 measures (30 percent) were passed as part of the General Election in November 1992. The volume of bond and tax measures on the ballot and the rates of passage for these measures represent declines from prior elections. In addition, local officials once again encountered significant difficulty in generating the necessary two-thirds voter approval for local general obligation (G.O.) bonds. The 1992 Primary Election witnessed the approval of six of 21 local G.O. bond measures (29 percent passing). The success rate was better in November when 13 of 30 (43 percent) local G. O. bond measures garnered the necessary two-thirds approval.

The rate of success for local general obligation bonds could improve significantly if the State's electorate approves ACA 6 on the June 1994 ballot. ACA 6 would permit permit local general obligation bonds for school facilities to be passed with a majority vote. In fact, had such a provision been in place for all local G.O. bonds placed before the voters at Primary and General Elections since 1986, 88 percent (127 of 144) of these measures would have been approved. Instead, only 38 percent (55 of 144) of these measures were able to achieve the two-thirds approval necessary for passage.

In closing, the California Debt Advisory Commission and its staff would like to acknowledge the assistance of the Secretary of State's office and the election departments of the 58 County Clerks' offices in the preparation of this report.

Sincerely,

KATHLEEN BROWN
State Treasurer
Chair, California Debt Advisory Commission

STATE AND LOCAL TAX AND BOND BALLOT MEASURES

Summary of Primary and General Election Results June 2, 1992 and November 3, 1992

I. INTRODUCTION

This report is a summary of the bond and tax measures which were decided at the June 2, 1992 Primary Election and the November 3, 1992 General Election in California. The California Debt Advisory Commission has been reporting on the results of bond and tax elections since 1986. This marks the first time, however, that the results from both the Primary and General Elections have been incorporated into one report.

Primary Election Results. At the June 1992 Primary Election, there were 53 local bond and tax measures on the ballot, with 19 measures passing and 34 failing (a passage rate of 36 percent). At the same election, two State general obligation bond (G.O.) measures in support of education facilities (Propositions 152 and 153) passed with slight majorities. The total number of issues proposed as part of the June 1992 Primary Election was down from the 1990 Primary Election when the Commission reported on 64 local measures and eight State bond and tax measures. The declining number of measures in 1992 likely reflects the downturn in the economy and, at least at the State level, caution imposed by the massive defeat of State general obligation bonds in November 1990.

The rates of passage for various types of bonds and tax measures decided during the 1992 Primary election were also down slightly from figures posted in the previous statewide Primary held in June 1990. Notably, local general obligation bond measures (29 percent of the proposed measures passing) and special tax measures (14 percent rate of approval) faced a much more difficult time in June 1992 than was the case two years earlier. While local G.O. bond measures and special tax proposals have historically encountered low rates of approval, the June 1992 statistics were especially grim for these local financing tools.

General Election Results. A canvass of the 116 bond and tax measures from the November 3, 1992 General Election revealed that only 30 percent of all measures on the ballot were successful. This represents the lowest rate of passage since the Commission began its coverage of bond and tax elections in 1986. Of the 116 measures considered in November 1992, the voters approved 34 local bond and tax measures, defeated 80 other local measures, and split their vote on the two State general obligation (G.O.) bond measures. (There were two measures for the Shoreline Unified School District; one each in Marin and Sonoma County. The two measures will count as one for reporting purposes, although the results show a split vote in the summary.)

Based on Commission data, the November 1992 General Election results continued a downward trend that began with the 1988 General Election. Not only were fewer bond and tax measures being proposed in this General Election than in the previous two, but measures were passed at a much lower rate than was the case in either 1990 or 1988. For instance, there were 173 measures considered in November 1988, with 91 receiving approval (53 percent). By November 1990, the number of State and local

bond and tax measures on the ballot had dropped to 147, with 54 winning approval (a passage rate of 37 percent). Thus, the drop to 116 measures and declining passage rate of 30 percent for this General Election must be viewed as decidedly negative omens for public finance in California.

Forty-one of California's 58 counties had local measures on the November ballot. Marin County voters faced the greatest number of ballot measures (15), including eight special tax measures submitted by county service areas and fire protection districts to recover lost revenues as a result of State budget reductions. All but one of the special tax measures in Marin County were defeated.

Report Methodology. This is the California Debt Advisory Commission's fifth report on bond and tax measures. Prior publications reported the results of the 1986, 1988, and 1990 November General Elections and the 1990 June Primary Election. The State of California bond measure results were taken from the California Secretary of State's data. Local agency bond and tax measure information was received from county clerk departments of the state's 58 counties. The accuracy and completeness of local election results depends wholly on sample ballots and voter results provided by the county departments.

For purposes of this report, each election will be discussed separately. Summary tables for the various types of bond and tax measures for the June Primary Election begin on page A-1 in Appendix A while similar tables for the November General Election are contained in Appendix B beginning on page B-1. A complete list of all ballot measures for each election is contained in Tables A-8 and A-9, beginning on page A-7, for the Primary Election and Tables B-8 and B-9, page B-10, for the November Election.

JUNE 2, 1992 PRIMARY ELECTION

II. SUMMARY OF STATE AND LOCAL BOND MEASURES BY PURPOSE

A. Education

Of the 21 education measures considered in June 1992, two State of California and five local measures were approved (33 percent rate of passage). Statewide, voters approved Proposition 152 to provide \$1.9 billion for K-12 school facilities, and Proposition 153 to provide \$900 million for higher education facilities. The approval marks for these two general obligation bond measures were 53 percent and 51 percent, respectively. In June 1990, California voters approved two smaller bond measures (\$800 million for K-12 schools and \$450 million for higher education) by slightly higher margins (57 percent and 55 percent, respectively).

Voters also approved K-12 school facilities in the El Centro, Farmersville Union, Robla, Rim of the World Unified, and San Diego Unified School Districts. However, fourteen other education measures for K-12 school facilities and educational programs were defeated. The June 1992 passage rate of 26 percent for local education measures is slightly below the approval rate from the June 1990 election when 29 percent of local education measures passed (four of 14).

B. Capital Improvements and Public Works

Six of 17 capital improvement and public works measures were approved in local elections held on June 2, 1992 (a passage rate of 35 percent). Of the six, two measures were for water supply and storage facilities, two were for parks and recreation facilities and programs; and two were approvals for the use of motor vehicle license fees for transit and guideway projects in Santa Barbara and Imperial Counties.

C. Life Support

Only four of 10 life support measures (i.e. police, fire, or emergency medical services) on local ballots were approved. They included services in Cloverdale Hospital District, Dulzura Community Rural Fire Protection District, Marin County Service Area No. 28, and an advisory vote in San Diego County. The 40 percent passage rate for life support measures at the 1992 Primary Election was slightly below that witnessed in June 1990 when eight of 18 such measures were adopted (44 percent).

D. Miscellaneous Purposes

This umbrella category includes measures for seismic safety, hospitals, and general fund support. Both seismic safety measures proposed for Oakland and the Berkeley Unified School District passed. Hospital measures on the ballot met different fates, however, as the Tehachapi Valley Hospital District voters approved a special tax measure, while Palo Verde Hospital District voters defeated a similar proposal. A proposal for general tax increase in the City of Piedmont was approved, while two other general tax measures in Shasta County and the City of Morgan Hill were defeated.

III. BONDS

A. State General Obligation Bonds

As previously noted, the electorate approved two State of California general obligation bond measures. Proposition 152 provides \$1.9 billion for K-12 school facilities, and Proposition 153 targets \$900 million for higher education facilities. The placement of only two State G.O. bond measures on the Primary Election ballot undoubtedly was influenced by the results of the November 1990 election, when voters defeated 12 of the 14 State general obligation bond measures proposed on the ballot.

B. Local General Obligation Bonds

The Commission's survey indicates that 21 local general obligation bond measures, totalling \$841 million, were on the June ballot. Of the 21 local G.O. measures, six issues passed and 15 were defeated, an approval rate of 29 percent. There were two successful bond measures in Alameda County where voters approved \$158 million in school earthquake and seismic safety bonds for Berkeley Unified School District and a \$50 million issue for seismic safety and emergency response for the City of Oakland.

Less successful were G.O. bonds in the City and County of San Francisco, where only one of four general obligation bond issues passed. San Francisco voters approved a \$76 million issue for renovations to Golden Gate Park, but rejected three measures for Civic Center rehabilitation. Finally, three school districts passed G.O. bond measures for their K-12 schools: El Centro School District (\$8 million); Robla School District (\$32 million); and Farmersville Union School District (\$4 million).

As has been the case in previous elections in California, several of the defeated local G.O. bond measures came within percentage points of achieving the two-thirds vote needed for passage. For example, both Clovis Unified School District and Windsor Union School District received over 63 percent voter approval, falling just short of the two-thirds required. Of the 15 measures that failed in June 1992, eight received at least 50 percent of the vote. In June 1990, eight of 16 local G.O. bond proposals were approved, with seven of the eight defeated measures realizing at least 50 percent voter approval.

C. Local Revenue Bonds

Elections to approve revenue bonds have become less common as local governments have turned to other forms of indebtedness to finance enterprise facilities. Consistent with this trend, only one revenue bond proposal was before a local electorate at the June 1992 election. The measure, a \$100,000 revenue bond measure for water supply and storage facilities in Fort Jones, was overwhelmingly approved by 92 percent of those casting votes.

A summary of State and Local General Obligation Bonds is in Table A-1 and A-2 beginning on page A-1, and the sole Local Revenue Bond measure in Table A-3 page A-3.

IV. TAX MEASURES

A. Use and Transactions (Sales) Tax

Shasta County placed a transactions and use (sales) tax measure on the ballot and it was soundly defeated with only 24 percent voting in favor of the measure, which required majority approval. It would have provided funds for county general government purposes and would have increased the sales tax by 0.5 percent. Since 1987, when counties were authorized to pass sales tax measures for general purposes by majority vote, only Inyo County has been able to muster the 50 percent needed.

B. Special Taxes

Voters approved special taxes in the Tehachapi Valley Hospital District for hospital improvements, and in Marin County Service Area No. 28 and in the Cloverdale Hospital District for life support services. The tax measures ranged from \$18 per year for Cloverdale Hospital District to \$25 per year for Tehachapi Valley Hospital District and the Marin County Service Area.

Twelve other measures proposing local tax increases were defeated, reflecting a passage rate of 20 percent. (Pursuant to Proposition 13 in 1978, special tax measures must receive two-thirds of the vote in order to be approved.) Two Mello-Roos district tax measures failed (Kern County's Lakeside Union School District and Santa Barbara County's Solvang Elementary School District), as did other special tax measures for expanded educational services, life support services, a hospital, library services, and parks and open space projects.

The passage rate of 20 percent represents a significant drop from the 1990 Primary Election in California when 11 of 28 local sales tax measures were passed, a success rate of 39 percent.

C. General Tax Measures

General tax measures, which require a majority vote of the electorate for approval, passed in two areas and failed in two others. These taxes are ordinarily assessed against parcels or are in the form of utility or business taxes. Voters in Piedmont approved a general tax for general government expenses by a margin of 75-25 percent, and Dulzura Community Rural Fire Protection District in San Diego County approved a fire zone and tax for life support. Conversely, voters in the City of Morgan Hill and the Hesperia Fire Protection District defeated general tax measures in those communities.

As with other types of local tax and bond measures, the four general tax measures proposed at the 1992 Primary Election reflected a significant drop from the 1990 Primary Election when there were 13 such measures. At that election, voters considered six transit occupancy taxes (four approved), three business tax measures (two approved), two utility user's tax (both were defeated), and two advisory measures on general tax increases (one approved).

D. Other Tax Measures

There were 11 miscellaneous tax-related measures on local ballots covering a variety of purposes. Issues winning approval included: (1) authorization for Imperial and Santa Barbara Counties to spend motor vehicle license fees for public transit and guideways; (2) a measure allowing the Paradise Irrigation District to enter into a Department of Water Resources loan for water supply and storage; and (3) proposals allowing the Rim of the World Unified School District and Santa Clara County to use existing taxes for educational and parks/open space purposes, respectively. Also approved was an advisory vote in San Diego County to allow a portion of the tax dollars collected by the Regional Justice Facility sales tax to be used for police protection services.

Measures that failed included El Dorado County's proposal to use motor vehicle license fees for county transit and guideways; establishment of a citywide benefit assessment district for flood control and storm drainage in Lancaster; and advisory votes to allow general fund money to be spent for a sports stadium in San Jose and to renovate Babcock Court in Coronado.

Summary tables for all the tax measures begin on page A-3 of Appendix B.

V. COUNTIES REPORTING NO LOCAL BOND AND TAX MEASURES

Thirty of the 58 counties in California reported at least one local bond or tax measure on their Primary ballot. The following counties reported no local bond or tax measures at the June 2, 1992 Primary Election: Alpine, Amador, Calaveras, Colusa, Del Norte, Glenn, Kings, Lake, Lassen, Madera, Merced, Modoc, Mono, Napa, Nevada, San Benito, San Joaquin, San Luis Obispo, Santa Cruz, Sierra, Solano, Stanislaus, Sutter, Tehama, Trinity, Tuolumne, Ventura, and Yuba.

NOVEMBER 3, 1992 GENERAL ELECTION

VI. SUMMARY OF STATE AND LOCAL BOND MEASURES BY PURPOSE

A. Education

Although the results from the November 1992 General Election were bleak on most fronts, education financing provided one bright spot, with 14 of the 25 proposed education measures winning passage (an approval rate of 56 percent). The winning measures included a State of California general obligation bond for K-12 school facilities, two local G.O. bonds for community college facilities in Alameda and Los Angeles Counties, and ten bond or special tax measures for K-12 public school facilities and programs. A measure to allow additional educational uses for an existing tax in the Gilroy Unified School District was also approved.

The number of education measures receiving voter approval at the November 1992 General Election represents a partial reversal from the results of the General Election in November 1990. At that time, only 9 of 23 education measures (39 percent) were approved. It also marked an improvement over the results from the June 1992 Primary Election when only 33 percent of the measures for education passed.

B. Capital Improvements and Public Works

There were nine successful local measures concerning capital improvement and public works projects, with eight of these measures providing added funding and one measure removing support for solid waste services. Increased funding was provided in the Marin Municipal Water District and the Nevada Irrigation District for water supply and storage facilities; in Santa Clara, Mendocino, and Humboldt Counties for transit-related purposes; in Los Angeles County for wastewater treatment facilities; in the City and County of San Francisco for a public building, and in Rincon Ranch Community Services District for a street construction project. In addition, voters approved a measure in Amador County to rescind a tax for solid waste disposal services.

The November 1992 General Election did not offer any good news for those persons interested in libraries or parks, open space, and recreational facilities. All 11 issues that would have provided financing for libraries or library services were defeated. Likewise, all 12 measures intended to provide either recreational, open space, or park facilities were defeated. The results were much better at the prior General Election in November 1990 when two of four library proposals were approved and none of the 26 measures (35 percent) for parks, open space, and recreational facilities were passed.

C. Life Support

Overall, only six of 30 life support measures (20 percent) were approved by voters. *Life support* refers to police, fire and emergency medical services. The winning life support measures included those in Emeryville, Moraga Fire Protection District, Fieldbrook Community Services District, City of Los Angeles, Marin County Service

Area No. 13, and Post Mountain Public Utilities District. The rate of approval for these types of measures in November 1992 was significantly down from the results of the November 1990 General Election, when over 45 percent of life support measures (nine of 20) were approved by voters.

D. Miscellaneous Purposes

A mixed picture emerged for the miscellaneous tax and bond proposals on the November 1992 ballot. One of three hospital measures (Seneca Hospital District) was approved. Of 11 measures to provide additional funding for general government services, only three proposals (a transit occupancy tax increase in the City of Oroville, a general sales tax increase in Del Norte County, and retention of a utility users tax in the City of Pacifica) won the electorate's approval. Various fees and taxes to remove graffiti (City of Moreno Valley), assist mobilehome development (City of Yucaipa), and to pay for animal control services (Butte County) were all defeated. Finally, two seismic safety proposals in the City of Berkeley and the City and County of San Francisco were approved.

VII. BONDS

A. State General Obligation Bonds

There were only two State of California G.O. bond measures on the November 1992 ballot. Proposition 155, a \$1.9 billion bond for public school facilities, passed by a narrow margin of 51.8 percent. Not so fortunate was Proposition 156, a \$1 billion G.O. bond proposal for transit and transportation programs, which was defeated by a margin of 48.1 percent to 51.9 percent. Unlike local G.O. bonds, the State's general obligation bond proposals need only a majority of the electorate's approval for passage.

Again, the relatively small number of State general obligation bonds on the ballot appears to be in response to the high number of bond proposals which have been on previous ballots and the dismal results from the November 1990 election, when 12 of the 14 State G.O. bond measures were defeated. The Legislature has exercised caution in placing measures on the ballot and the initiative process has not placed a bond measure on the ballot since 1990.

B. Local General Obligation Bonds

There were 30 local general obligation bond measures on the ballot which proposed over \$1.1 billion in financing for schools, parks, libraries, seismic safety projects, and health facilities. Thirteen measures, with a total dollar volume of \$676 million, passed. The remaining 17 issues, with a proposed dollar volume of \$448 million, failed to generate the two-thirds necessary for passage.

As with past elections, the two-thirds requirement for local general obligation bonds proved to be a significant hurdle for local officials to overcome. Of the 17 defeated measures, 11 received at least 50 percent of the popular vote. This is up slightly from June 1992 when only eight of 15 defeated measures mustered a majority

of the local vote. In November 1990, by contrast, 19 of 21 defeated measures sustained majority approval, only to fall short of the two-thirds needed.

Ten of the 13 measures that did pass will provide funds for local public school and community college district facilities. The other three issues were for a public building in the City and County of San Francisco and seismic safety projects in Berkeley and San Francisco.

C. Revenue Bond Measures

Both the City of Los Angeles and the Marin Municipal Water District proposed revenue bond measures in the November 1992 election. Los Angeles voters approved \$1.5 billion for wastewater treatment facilities, while Marin Municipal Water district voters approved \$37.5 million for a water supply and storage project. Revenue bond measures placed before the voters only require majority approval for passage.

Summary tables for State and Local General Obligation Bond Results and Local Revenue Bond Measures begin on page B-1 of Appendix B.

VIII. TAX MEASURES

A. Use and Transaction (Sales) Taxes

Since 1978, local sales tax measures proposed in California have been approved according to a majority vote doctrine. However, a 1991 California Supreme Court decision (i.e. *Rider vs. County of San Diego*) has raised the possibility that certain types of sales tax measures are, in fact, special taxes which require two-thirds voter approval. Because the court was somewhat vague as to the applicability of the *Rider* decision to other sales tax measures, the voting threshold for each sales tax measure proposed will likely be decided on a case-by-case basis.

Of the five local sales tax measures proposed, just two measures received a majority of the votes needed for approval. Del Norte County passed a sales tax for general government purposes with 59 percent of the vote, and 54 percent of the voters in Santa Clara County approved a measure that extends their existing sales tax for transportation purposes, due to expire in 1994, for 20 more years. The local sales tax measures that failed included a general government sales tax for Imperial County (29 percent in favor); a parks and open space measure for the Napa County Regional Open Space District (29 percent aye); and a measure to allow San Diego County to use sales tax revenues, which had previously been collected but disallowed under the *Rider* case, for jail facilities (41 percent).

B. Special Taxes

By far, the most prevalent type of proposal on the November 1992 ballot were measures to raise special taxes. There were a total of 55 special tax measures, and of that number, eight passed (the two Shoreline issues counted as one) and 47 failed (an approval rate of .15 percent). As with local general obligation bonds, the two-thirds

voter approval requirement for special taxes proved to be a formidable obstacle to passage.

While it has been historically difficult for local governments to generate two-thirds vote support for special tax measures, the results of the 1992 General and Primary Elections were especially gloomy. As previously noted, the 1992 Primary Election saw only three of 15 special tax measures succeed (20 percent passage rate), while the November election results showed no improvement with an approval rate of 15 percent. (If the Amador County measure to repeal their solid waste disposal fee is excluded, the actual approval rate is only 13 percent.) By contrast, the rates of passage for special tax measures in the 1990 General and Primary Elections were 32 and 39 percent, respectively.

Special tax increases were approved for life support services in the Contra Costa County Moraga Fire Protection District, the Humboldt County Fieldbrook Community Services District, the City of Los Angeles, and Marin County Service Area No. 13. Voters in the Seneca Hospital District approved a special tax for improvements to their hospital. In the San Diego County Rincon Ranch Community Services District special taxes will be used for street construction and repair, while the voters in the Shoreline Unified School District authorized special taxes for educational programs in that district. And as noted, a measure to repeal a fee and abolish County Service Area No. 7 for solid waste disposal was passed in Amador County.

Twenty of the defeated special tax measures were for life support services and proposed increases needed to replenish tax funds that were lost as a result of the 1992-93 reduction in State support for these districts. Other measures would have provided funds for libraries and library service, recreation and park facilities, educational programs, prisons and jails, and animal control services. There was also a measure in Moreno Valley to fund graffiti removal, which failed.

Community Facilities Districts. As authorized under the provisions of the Mello-Roos Act, there were two Community Facility District (CFD) measures on the ballot. Pacific Grove CFD No. 1 in Monterey County proposed a \$2.9 million bond issue for a library and Siskiyou County CFD No. 1 offered a measure authorizing a tax for library services. Both proposals failed.

On November 17, 1992, Riverside County's Perris Union High School District CFD No. 92-1 held a special election at which a \$40 million bond issue was approved. This measure was not part of the General Election, but is included in our report for statistical purposes.

Transit Occupancy Tax (TOT). A TOT measure for Pacific Grove is listed in the Special Tax section of this report because its revenue was to be dedicated to park and open space projects which necessitated a two-thirds rather than majority vote. The measure was defeated although it did receive a bare majority of votes cast in the city.

C. General Tax Measures

Only four of the 15 general tax measures on the November 1992 ballot were approved by voters. Voters approved two life support issues, one in Emeryville and the other in the Trinity County Post Mountain Public Utility District. An advisory vote in Pacifica approved retaining the existing utility tax, and voters in Oroville voted to increase their transient occupancy tax from six to nine percent. Six utility users' tax

measures were defeated, as well as a business tax proposal and several tax measures to provide life support services.

D. Other Tax Measures

Humboldt and Mendocino Counties passed measures that would allow a portion of their motor vehicle license fee revenues to be used for transit and guideway projects. Nevada Irrigation District voters approved the purchase of their outstanding revenue bonds at the market price instead of at par, and Gilroy Unified School District approved additional uses for an existing special tax. Voters in San Francisco defeated a proposal to allow the local Department of Health to lease up to \$22 million in equipment, and an advisory measure to create an assessment district for parks and open space in the City of Millbrae lost.

Summary tables for the Tax Measures are contained in Appendix B beginning on page B-4.

IX. COUNTIES REPORTING NO LOCAL BOND OR TAX MEASURES

Forty-one of the state's 58 county reported some activity in the area of bond or tax measures. Local bond and tax measures did not appear on ballots in the following seventeen counties: Alpine, Calaveras, Colusa, El Dorado, Kings, Lake, Mariposa, Merced, Modoc, San Joaquin, Shasta, Sierra, Tehama, Tuolumne, Ventura, Yolo, and Yuba.
