2008 SUMMARY OF CALIFORNIA PUBLIC DEBT ISSUANCE

This summary provides information on the major components of debt issued by public agencies in California for 2008. The total dollar volume reported for the year amounts to \$68.9 billion. This total includes both long-term and short-term debt, tax-exempt and taxable debt, as well as debt issued for the purpose of refunding existing indebtedness. The value of this report for financing professionals and policymakers, though, lies in its ability to answer questions concerning who issued the debt, how is the debt issued, and for what purpose was it issued.

Debt issuance in California is governed by a number of factors—the economy, public need, and the availability of funds. In 2008, the state’s economy was still in a recovery mode. Both local and state agencies faced tough budgetary challenges and turned to debt to address the pent-up demand for new projects, the need to repair infrastructure, and cover cash shortages.

The tables presented in this report include information on state agencies, local agencies, and student loan corporations. The structure of these tables is a function of the typical request for debt data received by the Commission. To obtain more detailed analyses, readers may contact CDIAC staff or download the debt issuance data from CDIAC’s website at www.treasurer.ca.gov/cdiac/debtdata/debtdata.asp. In addition, through CDIAC’s Debt Issuance Interface, individuals are able to search the commission’s database to obtain information on California bond issues at www.treasurer.ca.gov/cdiac/debtdata/database.asp.

The following tables include the dollar volume for all of the taxable and tax-exempt, long-term and short-term, and refunding debt issued, unless otherwise noted. A brief synopsis of each table follows.

Overview Tables

Debt information by all of the types of agencies is included in the three overview tables. They are:

- *Overview of 2008 Public Debt Financings by Type of Issuer.* This table shows the total dollar volume and number of issues sold by agencies in California that issue debt. It includes both long-term and short-term debt and compares the percentage of each type of agency’s debt to the total amount of debt issued for the year.
- *Summary of 2008 Public Debt Financings by Type of Issuer and Type of Debt Instrument.* This table aggregates agency debt by type of issuer and the type of instrument used to sell the debt. It shows the total volume by dollar amount and number of issues for notes/commercial paper, general obligation bonds, sales/limited tax obligation bonds, various categories of revenue bonds, special assessment bonds, tax allocation bonds, certificates of participation/leases, and other types of debt instruments.
- *Summary of 2008 Public Debt Financings by Type of Issuer and Purpose of Financings.* This table shows the total volume by dollar amount and number of issues for interim financing, education, housing, commercial and industrial development, hospitals health care facilities, capital improvements and public works (the majority of issues in this category were for infrastructure), redevelopment, and other purposes.

The next two tables list individual debt issues that are state or federally taxable and those that have been sold to refund part or all of a prior debt issue.

- *Summary of Taxable 2008 Public Debt Financings.* This table lists each bond issue that has been identified as either federally or state taxable. The issues are sorted according to state agency, local agency (by county), and student loan corporation. The type and purpose of each issue is identified, as well as its tax status and total amount issued.
- *Summary of 2008 Public Debt Financings Which Refund Existing Indebtedness.* This table lists only the state and local agency issues of which some portion of the principal amount is devoted to the repayment of prior debt. In some cases, the total amount is refunded; in others, the issue also contains new money debt.

State Summary Tables

The next group of tables summarizes debt issuance for the State of California and its agencies.

- *Overview of 2008 Debt Financings and Refundings by State Issuers.* This table contains the aggregate debt issued by the State of California, its agencies, and departments. It presents the total volume by dollar amount and number of issues sold by state agency, commission, or department; the percentage of the total state issuances; and the total volume (if any) for refunding prior debt.
- *Summary of 2008 State Debt Financings by Type of Debt Instrument.* Information on the various types of debt instruments sold by the State of California and its agencies is contained in this table. This table identifies the number and dollar volume of notes/commercial paper, general obligation bonds, sales/limited tax obligation bonds, various categories of revenue bonds,

special assessment bonds, tax allocation bonds, certificates of participation/leases, and other types of debt instruments.

- *Summary of 2008 State Debt Financings by Purpose of the Financing.* The final summary table of state issuance aggregates the total dollar volume and number of issues categorized by the purpose for which the debt was sold. State funding for infrastructure projects is detailed in the capital improvements and public works category.

Local Agency Summary Tables

The next five tables contain the summaries for local agencies. Each table is organized by county and then jurisdiction within the county. Local agencies whose boundaries span several counties, i.e., statewide financing authorities, joint unified school districts, etc., are placed at the end of each section under “Multiple County.”

The first three tables contain debt information on all issues sold by local agencies. Selected information from the local debt data is excerpted for the last two tables—the *Capital Improvements and Public Works Table* and the *Land-Based Table*.

- *Overview of 2008 Debt Financings and Refundings by Local Issuers.* This table contains the aggregate debt issued by all local agencies. It presents the total volume by dollar amount and number of issues sold by each local agency, the percentage of the total local issuances, and the total volume (if any) for refunding prior debt.
- *Summary of 2008 Local Debt Financings by Type of Debt Instrument.* Information on the various types of debt instruments sold by local agencies is contained in this table. This table identifies the number and dollar volume of notes/commercial paper, general obligation bonds, sales/limited tax obligation bonds, various categories of revenue bonds, special assessment bonds, tax allocation bonds, certificates of participation/leases, and other types of debt instruments.

- *Summary of 2008 Local Debt Financings by Purpose of the Financing.* This table aggregates the total dollar volume and number of issues categorized by the purpose for which the debt was sold. Local agency funding for infrastructure projects is detailed in the capital improvements and public works category.
- *Summary of 2008 Local Debt Financings for Capital Improvements and Public Works.* This table refines the capital improvements and public works category presented in the prior table. Information in this table contains the totals for local agency issuance for airports, ports, and harbors; power generation and transmission; bridges, highways, street construction, and public transit; prisons, jails, and correctional facilities; convention centers, public buildings, and parking; multiple capital improvements and public works; wastewater collection, treatment, and solid waste recovery; water supply storage and flood control and storm drainage; recreation and sports facilities, parks, and open space; and all other capital improvements and public works.
- *Summary of 2008 Public Debt Financings for Land-Based Issues.* This table reflects an ongoing interest in the use of special assessment and Mello-Roos Community Facilities District bonds. These methods of financing have been used extensively in California and have provided two avenues for local agencies to build needed local infrastructure and educational facilities. The data in this table are selected from the local issuance information and show the total dollar amount sold, the amount refunded (if any), and the type and purpose for which the debt was issued.
- *2008 California Public Debt Issuance by Type and Refunding, Purpose and Refunding, and by County of Origin and Refunding.* These three tables present the grand totals for type, purpose, and county categories. Each table presents the information by state, local, and student loan corporation issuer. These tables aggregate the details contained in the *Summary Tables*. The tables note the number of issues, the amount issued and percentage of the total volume, as well as refunded amount and percentage of the principal amount sold for refundings.
- The *Type* and *Purpose* tables are available on the CDIAC website for the prior years and are updated monthly as CDIAC receives reports of debt issuance for the current year.

Authority for Collection of Information

The debt issuance information contained in this document was provided to the California Debt and Investment Advisory Commission under the provisions of Section 8855 (k-1) of the California Government Code. Data includes information for issues sold from January 1 through December 31, 2008, and reported to the Commission by April 13, 2009, by state, local and student loan corporation issuers. The data is not audited by the Commission.

Debt information gathered throughout the year is available in several formats. This publication is a companion to:

- *2008 Calendar of California Public Debt Issuance.* This is a compilation of each debt issue reported sold in 2008. It is organized by county and issuer and presents the year's history of each agency's debt issuance. It is a printed record of the detail for the *2008 Summary of California Public Debt Issuance*.

Other Summary Tables

- *Summary of 2008 Student Loan Corporation Debt Financings by Type and Purpose.* This table contains the amount issued, any refunded amount, the type of debt, and the purpose of the debt sold by student loan corporations.

Source: California Debt and Investment Advisory Commission

REFERENCE NOTES

¹Totals include long-term debt, short-term debt, taxable debt, and debt issued to refund existing indebtedness. Amounts are reported to the California Debt and Investment Advisory Commission under Section 8855(g) of the Government Code. Figures may not add due to rounding. All percentage comparisons in the report are based on the actual figures, not the rounded versions thereof.

²The type of issuer was determined through a review of the official statement for the financing, publications made available by the State Controller's office, and/or other sources.

³Total debt issuance for 2008 was \$68,918,560,593. This is the figure used to calculate percentages of total debt issuance. Amounts are rounded, and therefore may not add to the total due to rounding.

⁴Includes the Los Angeles Department of Water and Power, airport departments, parking authorities, city and fire protection districts combined financings, TRANs pools, as well as certain assessment and improvement districts.

⁵Includes districts created under the provisions of the Mello-Roos Community Facilities District Act of 1982, as amended.

⁶Refunding amounts are taken from reports filed with the California Debt and Investment Advisory Commission, official statements for issues, and other available bond documents.
