

It should be pointed out the downgrade in credit rating is the sole action of Standard and Poor’s, since the other two major national credit firms of Moody’s Investor Services and Fitch Ratings have maintained the “AAA” credit rating on all U.S. Treasury and Federal Agency debt issues. Even with the credit downgrade to the investment portfolio, the investment portfolio is still eligible and qualifies as a ‘permitted investment’ for City bond funds (i.e., project or acquisition funds).

This credit rating is for the City’s investment portfolio and does NOT reflect the credit rating of the City’s bond issues.

On August 11, 2008, the City of Anaheim’s Investment Policy was recognized and certified by the Association of Professional Treasurers of the United States and Canada (APT US&C) as meeting all standards and criteria established by the APT US&C.

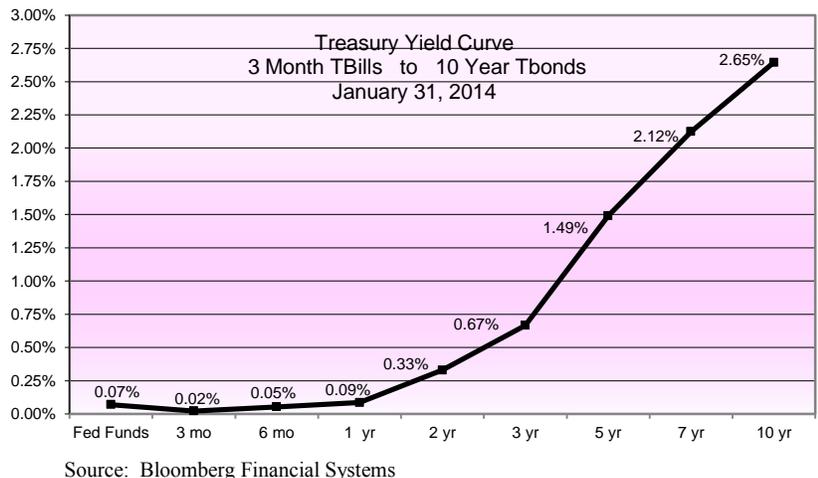

INVESTMENT ENVIRONMENT:

The month of January 2014 saw interest rates move significantly lower across the entire U.S. Treasury yield curve as investor concern for lower than expected non-farm employment numbers were reported. The financial markets are apprehensive that the U.S. economy may be slowing as the rate of new hires for some firms is declining while other companies continue to restructure their main business cores and reduce personnel. We are now five years into the recovery from the “Great Recession” of 2008, which historically is one of the longest recoveries for the national economy. The U.S. Treasury 3 month bill closed January at 0.02%, down from its December 2013 close of 0.07%; the U.S. Treasury 2 year Note closed January at 0.33%, down from the prior month level of 0.38% and the 5 year U.S. TNote finished January at 1.49%, down 0.25% from the December close of 1.74%. The longer maturities showed similar declines, with the benchmark 10 year U.S. Treasury Note closing at 2.65%, down 0.38% from the December 2013 level of 3.03%.

The decline in yields is surprising in lieu of the Federal Reserve action to begin “tapering” the purchases of long term securities from approximately \$85 billion per month to \$75 billion per month and a further action announced in January to again reduce projected monthly purchases by another \$10 billion.

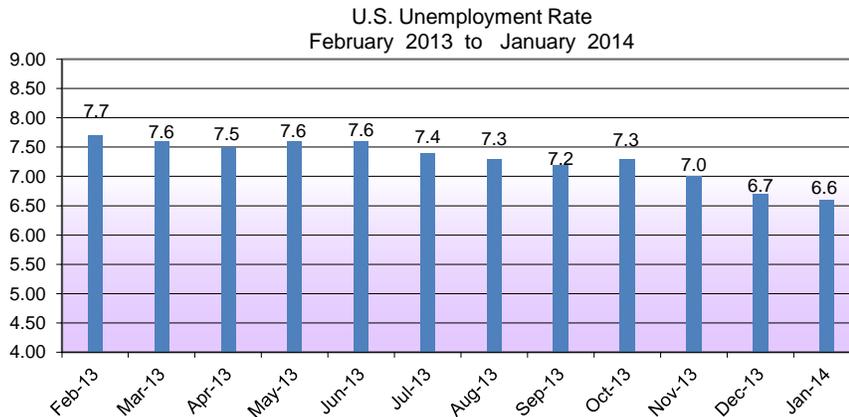

The Federal Reserve continues to monitor the economic data to maintain the modest growth and sustain the overall recovery from the “Great Recession” of 2008. The January 29, 2014 Federal Open Market Committee (FOMC) meeting continues to keep the benchmark Federal Funds rate at 0 to 0.25% with the language assessment changing to a ‘focus’ on “Growth”. The Federal Reserve lowered the Federal Funds rate to this historically low level at their December 2008 FOMC meeting. The Federal Funds rate is the interest rate that banks lend to each other to maintain their capital values and positions.

The chart below shows the interest rates for U.S. Treasury issues for the month ending January 2014:

A key economic indicator watched by investors is the national unemployment rate, which tends to show the overall health of the national economy. For the month of January 2014, the national unemployment rate was reported at 6.6%, down 0.1% from the December 2013 value of 6.7%. The twelve month average is at 7.3%, which is significantly lower from the December 2011 level of 8.5%, however, economists are divided as to whether the reduction in unemployment is the result of people being employed or are simply not looking any longer, which removes them from the unemployed survey.

The unemployment rate is considered a “lagging” economic indicator and does not reflect immediate or current financial and economic events. The unemployment rate does indicate the level of idle workers as a percentage of the overall labor force. The chart below shows the national unemployment rate for the past twelve months:

Source: U.S. Bureau of Labor Statistics

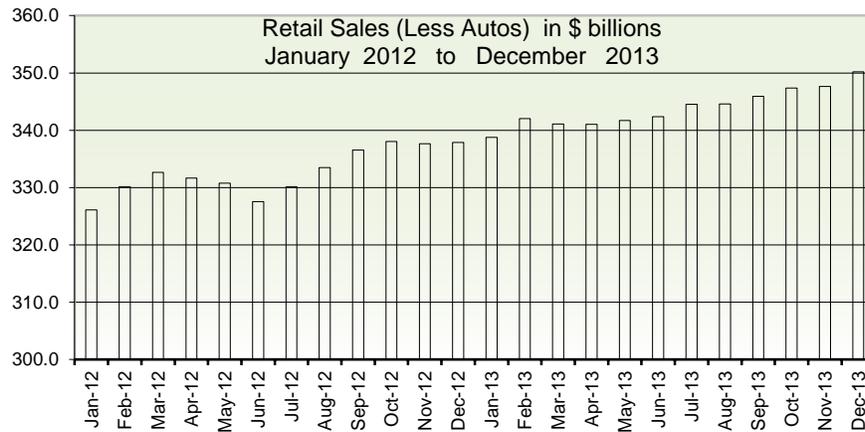

A more accurate gauge of the employment sector and the improving economy is the amount of jobs being created. The Bureau of Labor Statistics publishes monthly the value of US Employees on nonfarm payrolls, which is an indication of how the corporate or business sector is hiring. For the month of January 2014, the nonfarm payroll number was reported to be 113,000 new jobs created, significantly lower than expectations. For comparison, the December 2013 value was revised slightly upward to 75,000 new jobs from the previous value of 74,000. The annual (twelve month average) value with the revised values shows approximately 186,000 monthly new jobs are being created, which is above the minimum value of 180,000 new monthly jobs that economists have said are needed to show sustained economic growth. It should be noted the nonfarm payroll values are subject to seasonal variations and revisions, making an analysis of a distinct trend in this indicator difficult at times. The chart below shows the nonfarm payroll values for the past two years:

Source: U.S. Bureau of Labor Statistics

Another economic factor we watch is the monthly Retail Sales (less Autos), which measures the level of consumer spending and provides an indication of the underlying vitality of the overall national economy. At the time this

report was prepared, the January 2014 data were not available. The month of December 2013 value showed an annualized retail sales value of \$350.2 billion, up from the November 2013 value of \$347.7 billion, for a month over month percentage increase of 0.7%. The annualized increase, year to year, showed a percentage increase of 3.7%. The increase in month over month retail sales showed a healthy increase in consumer spending for the holiday season. It is estimated that consumer spending accounts for over sixty five percent of economic activity, so an increase in retail sales can indicate expanding economic activity. The chart below shows the monthly increase in consumer spending for the past twenty four months:

Source: Census Bureau, US Government

INVESTMENT PERFORMANCE:

The City’s investment portfolio remains strongly diversified and invested in high credit quality issues of U.S. Treasuries, Federal Agencies, Medium Term Corporate Notes and high grade commercial paper. Investments in money market accounts are restricted to U.S. Treasury and Federal Agencies only and a review of the State of California Local Agency Investment Fund (LAIF) shows high levels of liquidity and safe investments. The City’s investment strategy continues to focus on safety and providing liquidity for the City’s operational requirements.

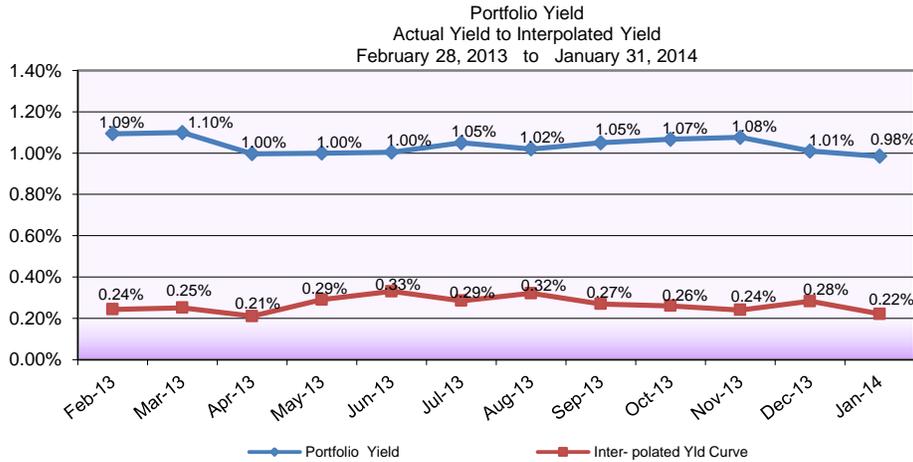

For January 31, 2014, the City Treasurer’s Investment Portfolio performance was:

	Amount of Funds (Market Value)	Maturity	Effective Yield	Interpolated Yield	Total Return Monthly	Total Return Annual
Short-Term Portfolio	\$ 140,354,792	24 days	0.16 %	0.03 %	0.014	0.158
Long-Term Portfolio	\$ 290,840,980	2.3 years	1.39 %	0.40 %	0.322	0.567
Total Portfolio	\$ 431,195,772	1.6 years	0.98 %	0.22 %	0.221	0.477

The portfolio balance includes a deposit for the acquisition funds of the 2011A Electric Bonds of \$20,910,801.00 as of the December 31, 2013 bond fund report balance. As a credit rated portfolio of “AA”, we are recognized as a permitted investment by the bond indenture of the above bonds. These funds enjoy the advantage of superior market rates of return in a historically low interest rate environment.

Please note the use of interpolated yield values and total return values are guidelines and not used in the performance evaluation of the portfolio. The investment of public funds is exposed to a large range of variable factors, such as increases or decreases in revenues and expenditures as well as seasonal timing, which can affect the cash flow of the City.

The City's investment portfolio continues to provide above market rates of return on funds invested as shown in the following graph which shows the City's net overall performance to a market indicator for the past twelve months:

Source: Treasurer's Office, Anaheim

The interpolated yield curve value of 0.22% reflects the current market interest rates comparable to the City's Investment Portfolio average weighted maturity of 1.6 years as of January 31, 2014. As shown, the City's Investment Portfolio interest earnings were 0.98% for January, a monthly approximate dollar earnings of \$269,907 over market interest rates. Cumulative earnings for the City portfolio earnings over market interest rates for the past twelve months are approximately \$3,249,356.

A complete listing of the portfolio holdings and investment activity for the City of Anaheim's Investment Portfolio for the month of January 2014 is on the following pages.

IMPACT ON BUDGET:

There is no budgetary impact. Interest income is allocated in various funds based on the performance of the Investment Portfolio.

Respectfully submitted,

Henry W. Stern, CTP
 City Treasurer

POOL PROFILE

September 30, 2013

City of Anaheim Treasurer Investment Pool

Fund Credit Quality Ratings Definitions

AAAF The fund's portfolio holdings provide extremely strong protection against losses from credit defaults.

AAF The fund's portfolio holdings provide very strong protection against losses from credit defaults.

A+ The fund's portfolio holdings provide strong protection against losses from credit defaults.

BBB+ The fund's portfolio holdings provide adequate protection against losses from credit defaults.

BB+ The fund's portfolio holdings provide uncertain protection against losses from credit defaults.

B+ The fund's portfolio holdings exhibit vulnerability to losses from credit defaults.

CCC+ The fund's portfolio holdings make it extremely vulnerable to losses from credit defaults.

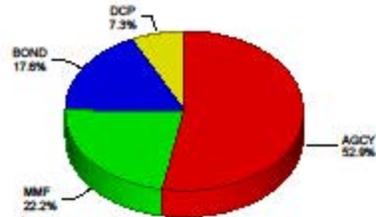

Plus (+) or Minus (-) The ratings from 'AA+' to 'CCC+' may be modified to show relative standing within the major rating categories.

Fund Credit quality ratings, identified by the '+' subscript, are assigned to bond funds and other actively managed funds that exhibit variable net asset values. These ratings are current assessments of the overall credit quality of a fund's portfolio. The ratings reflect the level of protection against losses from credit defaults and are based on an analysis of the credit quality of the portfolio investments and the likelihood of counterparty defaults.

Pool Rated Since	July 2008

Portfolio Composition as of September 30, 2013

AGCY - Agency Fixed Rate; MMF - Money Market Fund; BOND - Corporate Fixed Rate; DCP - Commercial Paper

*As assessed by Standard & Poor's

Pool Highlights

- The City of Anaheim Treasurer Investment Pool holds securities that have an average maturity of two years or less.
- The pool must purchase securities with a rating of 'A' or better.

Management

The treasurer for the city of Anaheim, California, is responsible for overall management of the portfolio. The treasurer has prior experience managing Standard & Poor's-rated government investment pools from his tenure at the cities of Los Angeles and Long Beach. The City of Anaheim's \$400 million-plus portfolio is divided into a short-term and a long-term portfolio; \$85 million to \$120 million comprises the short-term component. The investment policy is reviewed and submitted to the city council annually—with the current 2012 policy in effect—and applies to all cash and investments controlled by the Anaheim treasurer on behalf of the city.

Credit Quality

Standard & Poor's rates City of Anaheim Treasurer Investment Pool 'AAf/S1'. The 'AAf' fund credit quality rating is based on Standard & Poor's analysis of the credit quality of the portfolio's eligible investments, the counterparties, and the overall management by the portfolio's investment managers. The 'AAf' rating demonstrates that the fund's portfolio holdings provide very strong protection against losses from credit defaults. The 'S1' volatility rating indicates that the pool possesses low sensitivity to changing market conditions and an aggregate level of risk that is less than or equal to that of a portfolio comprised of government securities maturing within one to three years and denominated in the base currency of the pool. As part of Standard & Poor's volatility

analysis, it assessed the management, portfolio-level risk, target durations, and comparable return strategies of the portfolio.

Portfolio Assets

Eligible portfolio holdings are typically comprised of highly-rated securities, including money-market funds, investment-grade corporate debt, commercial paper, the Local Agency Investment Fund (LAIF), and U.S. Treasury and agency securities. The pool can only purchase securities with a rating of 'A' or better. The pool's primary objectives are to provide safety of principal, followed by maintenance of liquidity and return on investment. Various city departments are the pool's predominant investors. The short-term portfolio's benchmark is the 91-Day Treasury bill, which is managed with the view that cash is needed for operating purposes within a six-month period. The long-term portfolio's benchmark is the Merrill Lynch 1-3 Year U.S. Treasury Index. The pool's overall duration is currently 1.5 years, with a maximum duration of three years. Union Bank of California is the custodian for the pool.
