Allocation per Restricted Rental Unit:	\$	224,638 (\$15,500,000 /69 restricted units)

The Project has total project costs that appear high for the geographic area in which it is located. According to the Project sponsor, the high cost is due to infrastructure improvements. The Project will be built on an urban infill, brownfield site in San Diego. The site is a former school district maintenance yard. In order to make the site suitable for development, a street will be closed to join two separate parcels, requiring the relocation of various utilities (sewer, storm drain, water, electric, gas, and phone). In addition, removal of contaminated soils is required and the project includes two levels of subterranean parking. The project was approved by the City of San Diego conditioned upon making these infrastructure improvements. The addition of these costs is the reason the project's overall cost exceeds the CDLAC threshold.
