

CALIFORNIA DEBT LIMIT ALLOCATION COMMITTEE

Public Benefit Analysis Student Loan Program 2003 Round 1

Student Loan Bonds are tax-exempt private activity bonds issued by authorized agencies for the purpose of either financing direct loans to college students and their parents or purchasing bundles of already-originated loans on the secondary market. When used for direct lending programs, tax-exempt bond allocation allows lenders to pass on interest rate savings to needy students via below market interest rate loans. Needy students are borrowers for whom the cost to attend college exceeds their ability to pay, as determined by their school's financial aid office. Currently, only three agencies are authorized to issue tax-exempt bonds for student loan programs in California: ALL Student Loan Corporation, Chela Financial, Inc. and the California Educational Facilities Authority.

The California Debt Limit Allocation Committee ("Committee") is responsible for administering California's annual tax-exempt private activity bond program, known as "the annual State ceiling". For calendar year 2003, California's State ceiling is \$2.633 billion. Each year the Committee divides the annual State ceiling among several bond programs, known as "Program Pools", including the Student Loan (SL) Program Pool. For calendar year 2003, the Committee reserved \$155 million, or 5.9%, of the State ceiling for the SL Pool.

The Committee awarded the entire \$155 million SL allocation in the First Allocation Round of 2003. The ALL Student Loan Corporation and Chela Financial, Inc. each received an allocation award of \$77.5 million. Both issuers operate direct lending programs in California. Overall, the allocation will help to originate approximately 30,000 loans, saving borrowers hundreds of dollars over the life of the loan compared to conventional loans. Approximately \$128,340,000 or 83% of the allocation will benefit needy borrowers.
