Meeting Date: March 26, 2008
Executive Summary
Request for Final Resolution and
Assistance from the Small Business Assistance Fund

Prepared by: *Michael Smith*

Applicant:	South Tahoe Refuse Company and/or its Affiliates	Amount Requested:	\$16,615,000
		Application No.:	722 (SB)
		Final Resolution No.:	481
Project	City of South Lake Tahoe	Prior Actions:	IR 03-01
Location:	(El Dorado County), California		approved 1/28/03
			Extended 1/25/05

Type of Business: South Tahoe Refuse Company and/or its Affiliates (the “Company”) collects and processes for recycling and disposal solid waste in the South Lake Tahoe, Placerville and Douglas County, Nevada areas primarily from its headquarters location in South Lake Tahoe, where it currently has offices, a corporate yard and a Material Recovery Facility (MRF). Affiliated companies with the same ownership include Douglas Disposal, Inc., Tahoe Basin Container Service, Inc., American River Disposal Service and Sierra Disposal Service.

Project Description: The Company anticipates the renovation of an existing MRF in addition to the construction of new buildings containing approximately 32,000 square feet, staging areas and the purchase of equipment to be used therein. The Company also plans to construct a vehicle maintenance and parking facility. Total capacity of the facility will increase from 36,134 square feet to nearly 68,692 square feet.

The goal of the Project is to increase recycling to the level required by California AB 939 by removing organic materials from the current waste stream and targeting additional materials that are not being recycled. The new Resource Recovery Facility (RRF) will be dedicated to organic waste which will in turn increase the storage area in the MRF, allowing for additional separation and storage of other recyclable materials. Total storage area will almost double from 36,134 square feet to 68,692 square feet. Additionally, a residential green waste collection route will be added which will capture that waste stream as well as increasing the sorting efficiency on the MRF line. Recovered organic materials will be sent to a regional composting facility under an existing contract.

Public Benefits: The Company represents that the Project is designed to generate the public benefits described below.

Waste Diversion. The Company represents that the project goal is to increase recycling to the level required by California AB 939 by removing organic materials from the current waste stream and targeting additional materials that are not currently being recycled.

Other. The Company represents that the following tax revenues will be generated by the Project:

Property taxes	\$140,000 annually
Payroll Taxes	\$5,500 annually

Additionally, the Company anticipates creating three full-time jobs at its new RRF.

Pollution Control: The Company represents that the Project will generate the following pollution control benefits.

Improved Water Quality. The proposed facility will be operating on concrete or asphalt paved surfaces and will not operate on exposed ground areas. This will prevent seepage of undesirable materials into the ground water.

Recycling of Commodities. The new RRF will allow for greater space within the existing MRF to sort and recycle construction and demolition debris and material from community cleanup projects which are currently not fully MRF processed. Therefore, the applicant anticipates increasing the amount of material diverted and recycled from the waste stream in its service area when able to process the organic material in its new RRF.

Safe Disposal of Solid Waste. Safe disposal of solid waste that is in compliance with all applicable state and federal environmental regulations regarding solid waste disposal will result upon implementation of the Project.

Consumer Costs Savings. With the opening of the RRF, residents will be provided with new yard waste services at no increased fee. Commercial, self-haul customers will save both time and money by utilizing the new RRF due to reduced tip fees for clean organic loads and an automated scale system.

SBAF Assistance: The Company is a small business eligible for assistance from the SBAF in an amount not to exceed \$250,000.

Permits: The Company provided staff with copies of its Solid Waste Facilities Permit, Conditional Use Permit, and Notice of Determination.

Anticipated Timeline: The Company states that construction, renovations, and equipment purchases will commence in April 2008 and are scheduled to be completed in April 2010.

Financing Details: The Company anticipates a public offering of weekly variable rate bonds with a term not to exceed 30 years. The Company plans to secure the bonds with an irrevocable, direct pay Letter of Credit from Union Bank of California N.A. that is rated "A-/F1" or better by Fitch Ratings.
