Cost Analysis and Line Item Review

Staff analysis of project costs to determine reasonableness found all fees to be within TCAC’s underwriting guidelines and TCAC limitations. Annual operating expenses exceed the minimum operating expenses established in the Regulations, and the project pro forma shows a positive cash flow from year one. Staff has calculated federal tax credits based on 3.25% of the qualified basis. Applicants are cautioned to consider the expected federal rate when negotiating with investors. TCAC's financial evaluation at project completion will determine the final allocation.

Special Issues/Other Significant Information

Pursuant to TCAC Regulation Section 10326(g)(5), general partners and management companies lacking documented experience with Section 42 requirements using the minimum scoring standards at Section 10325(c)(2)(A) and (B) shall be required to complete training as prescribed by TCAC prior to a project’s placing in service. Specifically, the property management company, Picerne Management Corporation, shall complete training as prescribed by TCAC prior to the project placing in service.

This tax credit project is part of a larger 233 unit project that includes these 46 tax credit units, 3 manager units, and 184 market rate units. Instead of structuring the ownership of the larger project as an 80%/20% mixed-income project, the applicant currently anticipates separating the tax credit units out as a 100% tax credit project under a master lease which will specifically identify each of the tax credit units making up the tax credit project.

Local Reviewing Agency

The Local Reviewing Agency, the City of Newport Beach, has completed a site review of this project and strongly supports this project.

Recommendation

Staff recommends that the Committee make a preliminary reservation of tax credits in the following amount(s) contingent upon standard conditions and any additional conditions imposed by the Committee:

Federal Tax Credits/Annual	State Tax Credits/Total
\$731,406	\$0

Standard Conditions

If applicant is receiving tax-exempt bond financing from other than CalHFA, the applicant shall apply for a bond allocation from the California Debt Limit Allocation Committee's next scheduled meeting, if not previously granted an allocation; shall have received an allocation from CDLAC; and, shall issue bonds within time limits specified by CDLAC.

The applicant anticipates financing more than 50% of the project aggregate basis with tax-exempt bond proceeds as calculated by the project tax professional. Therefore, the federal credit reserved for this project will not count against the annual ceiling.

The IRS has advised TCAC that the amount of tax-exempt bonds issued, equivalent to at least 50% of aggregate basis, must remain in place through the first year of the credit period or until eligible basis is finally determined.

TCAC makes the preliminary reservation only for the project specified above in the form presented, and involving the parties referred to in the application. No changes in the development team or the project as presented will be permitted without the express approval of TCAC.

The applicant must pay TCAC a reservation fee calculated in accordance with regulation. Additionally, TCAC requires the project owner to pay a monitoring fee before issuance of tax forms.

As project costs are preliminary estimates only, staff recommends that a reservation be made in the amount of federal credit and state credit shown above on condition that the final project costs be supported by itemized lender approved costs and certified costs after the buildings are placed in service.

All unexpended funds in reserve accounts established for the project must remain with the project to be used for the benefit of the property and/or its residents, except for the portion of any accounts funded with deferred developer fees.

All fees charged to the project must be within TCAC limitations. Fees in excess of these limitations will not be considered when determining the amount of credit when the project is placed-in-service.

The applicant/owner shall be subject to underwriting criteria set forth in Section 10327 of the regulations through the final feasibility analysis performed by TCAC at placed-in-service.

Credit awards are contingent upon applicant's acceptance of any revised total project cost, qualified basis and tax credit amount determined by TCAC in its final feasibility analysis.

Additional Conditions

The applicant/owner is required to complete the following sustainable building methods in accordance with the bond allocation from CDLAC and provide the applicable certifications and documentation when the TCAC placed-in-service application is submitted:

- The project commits to becoming certified under any one of the following programs:
Leadership in Energy & Environmental Design (LEED); Green Communities; or the GreenPoint Rated Multifamily Guidelines
- The project will be developed beyond the minimum requirements of the green building program by meeting the GreenPoint Rated - Gold.
- The project will exceed 2013 Title 24 Standards for New Construction by 9% of the California Building Code.
