Re: SB 218 (Dodd) – The Qualified ABLE Program: Tax-Advantaged Savings Accounts

Dear Senator Dodd:

[Name of Your Organization is/I am] writing in support of SB 218, a measure that will prohibit the state from filing a claim against a beneficiary's CalABLE account for the payment of medical assistance paid under Medi-Cal. New opportunities for families to plan financially for people with disabilities presented by the rollout of ABLE plans across the country have been tempered by the Medicaid payback provision that currently exists in the federal ABLE legislation and Section 1396p of Title 42 of the United States Code. Limiting Medi-Cal recovery of CalABLE accounts would alleviate significant concerns held by individuals eager to participate in the CalABLE Program.

[Optional: Include specific information about why you/your organization is interested in/impacted by this issue.]

ABLE accounts stand to be a game-changer in helping provide financial security for people with disabilities, with the potential to break the cycle of poverty that often results from the inability to save money as a result of receiving public benefits. Unfortunately, account enrollment across the country has been slow due to fears around Medicaid recovery. Like other states, the success of California's ABLE program will rely on a high level of enrollment. SB 218 would allay these concerns and encourage program enrollment, as well as increase contribution levels.

Thank you for your commitment to empowering people with disabilities to finally save for the future they deserve. [Name of Your Organization is/I am] a proud supporter of SB 218.

Sincerely,

Your Name and Title
