California Alternative Energy and Advanced Transportation Financing Authority

Investing in communities and the green economy

2022 Annual Report to the California State Legislature

About CAEATFA:

The California Alternative Energy and Advanced Transportation Financing Authority (CAEATFA or the Authority) was established to advance the state's goals of reducing greenhouse gas emissions, increasing the deployment of sustainable and renewable energy sources, implementing measures that increase the efficiency of the use of energy, creating high quality employment opportunities, and lessening the state's dependence on fossil fuels. CAEATFA works towards these goals by strategically targeting public funds to leverage private capital investment and spur market transformation.

CAEATFA has developed and is currently implementing various programs, including:

- Sales and Use Tax Exclusion Program for Manufacturers incentivizing manufacturers to grow in California, this program provides a sales and use tax exclusion (STE) on equipment and machinery used in an Advanced Manufacturing process; for the "design, manufacture, production or assembly" of advanced transportation technologies or alternative source products, components or systems; or to process or utilize recycled feedstock. An additional STE incentive for projects that manufacture, refine, extract, process, or recover lithium is available for years 2022, 2023, and 2024.
- California Hub for Energy Efficiency Financing Programs implementing a series of programs
 designed to leverage private capital to help customers of the state's investor-owned utilities
 obtain lower-cost financing for energy efficiency retrofits. The GoGreen Financing Programs, as
 they are collectively known, are being administered in collaboration with the California Public
 Utilities Commission (CPUC).
- Property Assessed Clean Energy Loss Reserve Program supports residential Property Assessed
 Clean Energy (PACE) programs by addressing concerns raised by the Federal Housing Finance
 Agency (FHFA) regarding risk to federal mortgage enterprises from PACE financings. The PACE
 Loss Reserve Program will reimburse first mortgage lenders for specified losses resulting from a
 PACE lien on a property during foreclosure or forced sale to collect unpaid property taxes.
- Bond Program provides lower-cost bond financing for eligible projects, which have most recently included Qualified Energy Conservation Bonds (QECBs) and Clean Renewable Energy Bonds (CREBs). As the primary energy bond conduit issuer for the State of California, CAEATFA continues to work with stakeholders on developing innovative approaches to financing gaps.

The CAEATFA Board consists of:

Fiona Ma, CPA, Chair State Treasurer

Malia M. Cohen State Controller

Joe Stephenshaw

Director, Department of Finance

David Hochschild
Chair, California Energy Commission

Alice Busching Reynolds

President, California Public Utilities Commission

Overview of 2022 Annual Report

In accordance with the provisions of Section 26017 of the Public Resources Code, CAEATFA respectfully submits its Annual Report on program activities for the calendar year ending December 31, 2022.

This Annual Report contains information on the Authority's revenues and expenditures for fiscal year 2021-22 and projections of the Authority's need for the coming fiscal year. The report also includes an overview of activity under the Sales and Use Tax Exclusion (STE) Program, California Hub for Energy Efficiency Financing (CHEEF) GoGreen Financing Programs, Property Assessed Clean Energy (PACE) Loss Reserve Program, and CAEATFA's Bond Program.

SALES AND USE TAX EXCLUSION (STE) PROGRAM FOR MANUFACTURERS

Program Summary

In previous years, CAEATFA awarded \$100 million in sales and use tax exclusion (STE) annually to certain manufacturers to assist them in purchasing machinery and equipment to retain and expand high-end manufacturing across the State – growing jobs, our regions and communities, and the green economy. In 2022, CAEATFA was authorized an additional \$15 million in STE to assist lithium extraction projects, bringing the total to \$115 million in STE for the year.

Legislative Background

In March 2010, Senate Bill (SB) 71 (Padilla, Chapter 10, Statutes of 2010) directed CAEATFA to implement the Sales and Use Tax Exclusion Program (STE Program). The legislation authorized CAEATFA to approve eligible projects for an STE on equipment and machinery (qualified property) used for the "design, manufacture, production, or assembly" of either advanced transportation technologies or alternative energy source products, components or systems, as defined. The purpose of this program is twofold: to promote the creation of California-based manufacturing jobs that will stimulate the California economy, and to incentivize the manufacturing of green technologies that will help reduce greenhouse gases, as well as reductions in air and water pollution or energy consumption.

CAEATFA launched the STE Program in the fourth quarter of 2010; the CAEATFA Board approved the first eight applications for the program at its November 2010 meeting.

Inclusion of Advanced Manufacturing Projects

In September 2012, SB 1128 (Padilla, Chapter 677, Statutes of 2012) expanded the STE Program to include Advanced Manufacturing projects. The legislation also placed an annual limit of \$100 million

in STE awards for each calendar year. The Authority modified its regulations to accommodate the statutory changes and began accepting applications for Advanced Manufacturing projects in October 2013. The CAEATFA Board approved its first two Advanced Manufacturing projects at its December 2013 meeting.

Inclusion of Recycling Projects

Signed by Governor Jerry Brown in October 2015, Assembly Bill (AB) 199 (Eggman, Chapter 768, Statutes of 2015) further expanded the scope of the STE Program to include projects that process or utilize recycled feedstock. The Authority modified its regulations to accommodate the statutory changes and began accepting applications for recycling projects in August 2016. The CAEATFA Board first approved recycling projects at its October 2016 meeting.

Program Extension

AB 1583 (Eggman, Chapter 690, Statutes of 2019), the California Recycling Market Development Act, extended the program's sunset date from January 1, 2021 to January 1, 2026. To further the STE Program's focus on California job creation, AB 176 (Cervantes, Chapter 672, Statutes of 2019) requires a consideration of the extent to which a project will result in the loss of permanent, full-time jobs in California, and collection of wage data for each classification of full-time employees proposed to be hired or not retained.

Increase of Program Annual Allocation for Lithium Extractors

AB 209 (Committee on Budget, Chapter 251, Statutes of 2022), an energy and climate change bill signed by Governor Gavin Newsom in September 2022, authorized the STE Program to award an additional \$15 million in STE for projects that manufacture, refine, extract, process, or recover lithium for years 2022, 2023, and 2024.

Program Design and Evaluation Methodology

Overview of Application Process

As noted, until 2022, the STE Program was limited to awarding \$100 million in STE each calendar year, therefore, to ensure a broad distribution of awards, the annual allocation was divided into three different pools of STE: (1) \$20 million STE small-project pool for projects requesting \$2 million or less in STE, (2) \$65 million STE general pool (capped at \$10 million in STE), and (3) \$15 million STE large-project pool for applicants with projects requesting more than \$10 million in STE from the general pool. All application pools are made available at the first application deadline of the year. Figure 1 below provides a general overview of the STE application process.

FIGURE 1: OVERVIEW OF STE APPLICATION PROCESS

Application Submission

- •Two-part application: Part A (Narrative) & Part B (Spreadsheet).
- Order of consideration based on competitive criteria score.
- •\$10 million STE cap per applicant each calendar year.

Application Evaluation

- Staff reviews application and works with applicant to make sure it's filled out correctly.
- Project evaluated based on fiscal and environmental benefits to State.
- •Staff makes recommendation to Board whether to approve application.

CAEATFA Board Review

- Board reviews staff recommendation and votes at Board meeting.
- Board resolution authorizes Executive Director to enter into a legal agreement with the applicant.

Post Approval Process

- Applicant enters into legal agreement with CAEATFA.
- Semi-annual reporting of purchases.
- Annual project status reports.
- •3 years to use award.
- •15% of qualified property must be purchased or under contract within 18 months.

Net Benefit Analysis

Under the STE Program's statute, all applications are evaluated to determine the extent to which the anticipated benefits to the State from a project exceed the estimated cost of the avoided sales and use tax. Specifically, through the net benefits test established in the STE Program's regulations, applicants are evaluated based on criteria designed to measure the fiscal and environmental benefits, as well as other benefits of their projects.

CAEATFA staff evaluates the fiscal and environmental benefits that stem directly from the STE. Only the anticipated marginal additional production (and resulting fiscal and environmental benefits) associated with the sales and use tax exclusion are included for purposes of evaluating applications. The marginal additional production associated with the STE is determined based on an estimated increase in equipment purchases resulting from the STE — because the STE in effect lowers the cost of purchasing capital equipment, applicants are assumed to purchase more equipment than would be the case in the absence of the STE.

The net present value of the total *fiscal* benefits over the lifetime of the qualified property is derived from the applicant's

Who May Apply for an STE?

Eligible manufacturers looking to relocate or expand their manufacturing facilities in California may apply for an STE.

How Are Applications Evaluated?

Applications are evaluated based on the estimated fiscal and environmental benefits of the project.

What Can Be Purchased Using the STE?

Approved companies may use the STE for purchases of manufacturing equipment and machinery for up to three years, or when the project has reached its maximum Qualified Property amount, whichever comes first.

Are There Any Program Fees?

Yes, there is an application fee of 0.05% of the Qualified Property amount requested (min \$250, max \$10,000) and an administrative fee of 0.4% of the Qualified Property amount actually purchased during the term of the award (min \$15,000, max \$350,000).

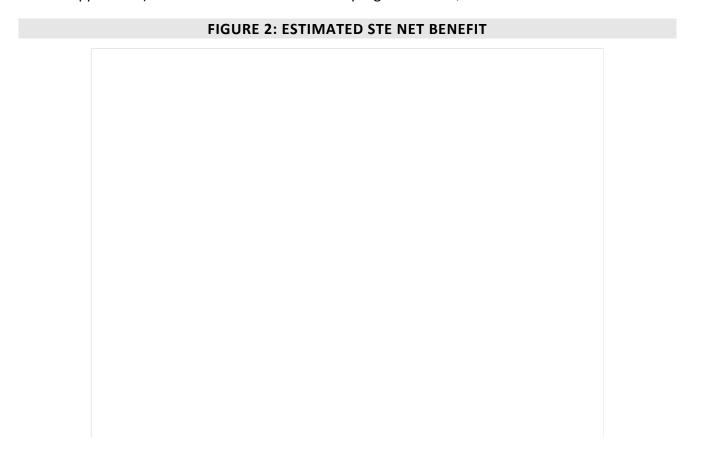

projected sales taxes, personal income taxes paid by the applicant's employees, corporation taxes on profits, property taxes and other indirect fiscal benefits of the applicant.

The methodology used to evaluate the *environmental benefits* differs based on the project type. The evaluation of Advanced Manufacturing projects focuses on the benefits resulting from the manufacturing process used to create a product, whereas evaluation of Alternative Source, Advanced Transportation, and recycling projects focuses on the benefits resulting from the end-product being manufactured.

For Alternative Source and Advanced Transportation projects, the environmental benefits include estimates of the dollar value of greenhouse gas reductions and reduction on dependence of fossil fuels. The environmental benefits are also derived from the capacity of manufactured products to generate electricity from alternative sources, thereby reducing the need for traditionally generated electricity. For recycling projects, the environmental benefits include estimates of the dollar value of greenhouse gas reductions resulting from the increased total amount of recycled materials produced. CAEATFA relies on models from the U.S. EPA, California Air Resources Board, and other state agencies for quantifying the environmental benefits of recycling the various types of materials.

Because the environmental benefits of Advanced Manufacturing projects generally stem from the improvements to the manufacturing process itself, the environmental benefits for Advanced Manufacturing projects are not monetized in the application scoring process as they are with Alternative Source and Advanced Transportation projects. Instead, points are given for specific environmental process improvements, such as reductions in energy and water consumption, solid and hazardous waste, and air and other pollutants.

Applications are evaluated to determine whether there is a fiscal benefit to the State, only considering the marginal increase in investment resulting from the STE. Figure 2 illustrates the estimated (at the time of application) net benefit over the life of the program—over \$1 billion as of December 2022.

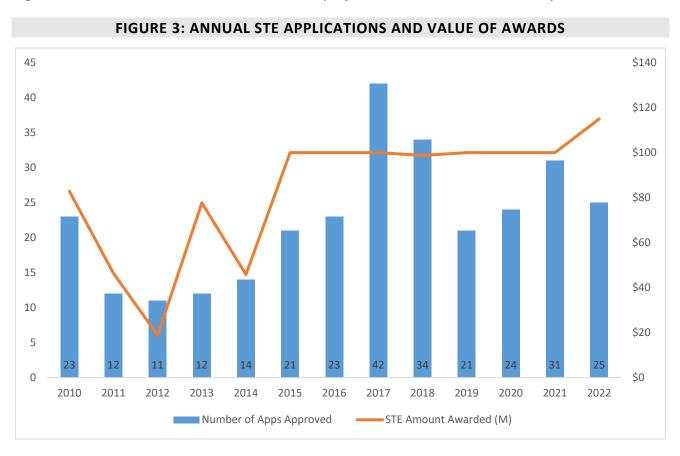

Historical Program Activity

From the STE Program's inception through December 31, 2022, CAEATFA approved a total of 303 project applications, of which 80 are active, 148 are complete, and 75 did not move forward.

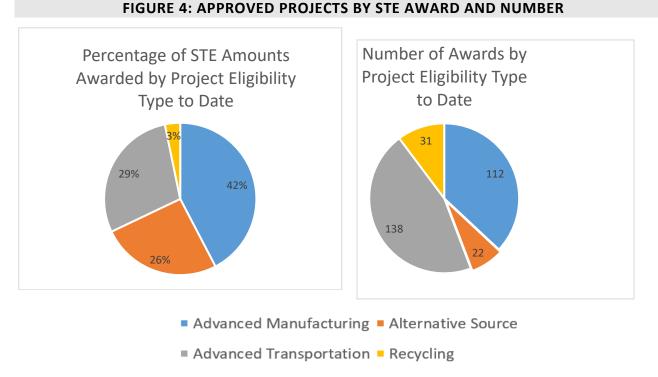

The 228 active and complete projects were approved for a total of \$9.7 billion in anticipated qualified property purchases estimated to result in approximately \$816.6 million in STE. These projects are located across 38 counties and are estimated to result in the retention and creation of 102,381 jobs. Under the program's evaluation process, 4,946 of these jobs are attributable to the STE Program. The projects are anticipated to produce an estimated \$234 million in environmental benefits and \$1.67 billion in fiscal benefits, resulting in approximately \$1.1 billion in net benefits to the state.

The program has been fully subscribed since 2015, awarding the full \$100 million in annual STE and in 2022, an additional \$15 million in STE authorized for lithium extraction projects. Such results are largely attributed to the growing number of projects assisted, as well as several large projects.

Figure 3, below, shows the total number of STE projects considered each calendar year.

The largest number of approved projects have been in the Alternative Source category, while a higher amount of STE has been awarded to projects in the Advanced Manufacturing and Advanced Transportation categories. This is likely due to the high capital intensity of these types of projects.

Detailed information on projects considered under the STE Program since its inception can be found in Appendix A.

Report of 2022 Activities

Applications Received

2022 was the first year in which the STE Program's annual allocation of \$100 million was oversubscribed by the first application deadline of the year. CAEATFA received 52 new applications for consideration; of these, five applications were deemed incomplete, one application was withdrawn, and one was ineligible. The projects had a combined value of approximately \$3.7 billion in anticipated qualified property purchases at the time of application submittal and were estimated to result in approximately \$314 million in STE. Appendix B lists all 2022 applications received.

¹ The STE Program was also oversubscribed by the first deadline in 2020, however, that was due to 2019 applications that were waitlisted carrying over and receiving STEs from the 2020 annual allocation. As of November 2020, the program waitlist expires at the end of each calendar year (California Code of Regulations Title 4, Division 13, Section 10032(a)(6)).

² The estimated STE amount is based on the average statewide sales tax rate at the time, which was 8.5%.

Program's Administrative Framework

In February 2022, emergency regulations approved in November 2020 and December 2021 were adopted under the formal rulemaking process. Changes³ addressed STE Program oversubscription, economic impacts of the COVID-19 pandemic, and improvements to streamline STE Program administration, as well as technical and grammatical changes that were included in the emergency regulations.

STE Project Pools and Order of Consideration

Because the STE Program is limited to awarding \$100 million in STE each calendar year, to help ensure a broad distribution of awards and ability to assist large, scalable projects, CAEATFA established an annual per-applicant cap and allocated STE into different pools based on the amount requested in an application. The modified regulations approved in November 2020 included a \$20 million pool of STE available through September for small projects requesting \$2 million or less; and a \$15 million pool of STE for larger projects that apply to exceed the \$10 million per-applicant cap. At the first Board meeting of the year during which applications are considered, this \$15 million large project pool is available to award on a competitive basis (up to \$10 million per applicant) in addition to the \$10 million in STE those applicants may receive from the general pool.⁴ If any of the \$20 million small project set-aside remains after the September Board meeting, it is made available to award to all applicants beginning in October.

Other critical regulation modifications included changing the competitive criteria (as described below) and disallowing waitlisted applications, that were submitted but not evaluated due to program oversubscription, to carry over into the new year for priority consideration.

Application Periods

To enable CAEATFA staff to adapt and respond to program demand, modified regulations approved in December 2021 established that effective in 2022, the Executive Director will announce application periods for the STE Program on the CAEATFA website⁵ prior to the start of each calendar year, including:

- (1) application periods;
- (2) application submission deadlines for each application period;
- (3) tentative dates of CAEATFA Board meetings for consideration of applications; and
- (4) the amount of STE available to award during each application period.

Previously, submitted applications would be considered on a rolling basis, at the first CAEATFA Board meeting occurring at least 60 calendar days after receipt. However, review and consideration has required more than 60 calendar days. The Executive Director may also reschedule and amend any

³ Detailed in the CAEATFA 2021 Annual Report to the California State Legislature

⁴ Requests from the \$15 million in STE pool are limited to \$10 million in STE per-Applicant (California Code of Regulations Title 4, Division 13, Section 10032(a)(5)(B).

⁵ California Code of Regulations Title 4, Division 13, Section 10032(a)(1)

announced application period by providing notice on the CAEATFA website and may reschedule or relocate any previously announced Board meeting so long as the information is posted on the CAEATFA website at least ten (10) days before the scheduled meeting. Essentially this prevents applications from being submitted after an application deadline and having un-reviewed applications sit for a long period of time before staff can assess how much STE is available.

Oversubscription and Competitive Process

Due to the 2022 oversubscription of the STE Program, all applications were ranked based on the following competitive criteria:⁶

- Applicants with Recycled Resource Extraction Projects or Projects that produce an Advanced Transportation Technology or an Alternative Source product, component, or system (100 points);
- (2) the unemployment rate of the county in which the project is located compared to the annual average statewide unemployment rate (up to 50 points);
- (3) the amount of the sales tax exclusion per job created as a result of the estimated marginal increase in equipment purchased from the STE (up to 75 points);
- (4) if the project is to relocate or rebuild the applicant's facility due to a fire, flood, storm, or earthquake identified in a state of emergency proclaimed by the Governor within two years of the time of application (50 points);
- (5) if the applicant has corporate headquarters located in California (15 points);
- (6) if the applicant is not eligible to use any of the exemptions established pursuant to Section 6377.1 of the Revenue and Taxation Code (administered through the California Department of Tax and Fee Administration) (50 points); and
- (7) if the Project's industry is in an Emerging Strategic Industry (75 points)⁷

At the first application consideration Board meeting held in June 2022, CAEATFA anticipated awarding the full \$100 million in STE, however, one applicant withdrew its application a couple of weeks prior. At the same June 2022 Board meeting, pursuant to the competitive criteria process and established pools of STE, the CAEATFA Board approved 23 applications. The 23 applications, in addition to the last approved 2021 application⁸, resulted in an estimated STE value of \$95,832,816, leaving \$4,167,183 in the program's general pool. In August 2022, the first application on the general pool waitlist was awarded the remaining \$4,167,183 in STE and \$2 million in STE from the 2023 calendar year.

⁶ California Code of Regulations Title 4, Division 13, Section 10032(a)(7)(B)

⁷ Qualifying projects in an Emerging Strategic Industry did not become a competitive criterion until December 2021.

⁸ When the amount requested in the Application exceeds the STE available in the calendar year, the Authority shall award the remaining STE request using STE from the following calendar year, up to \$2 million in STE (California Code of Regulations Title 4, Division 13, Section 10032(a)(7)(A)).

⁹ STE values do not add up precisely to \$100 million due to rounding issues.

In September 2022, the Governor signed into law AB 2887 (Eduardo Garcia, Chapter 248, Statutes of 2022) and AB 209 (Committee on Budget, Chapter 251, Statutes of 2022). AB 2887 increased the STE Program's annual statutory cap from \$100 million to \$150 million through its sunset date of January 1, 2026, and AB 209 allocated an additional \$15 million in STE for projects that manufacture, refine, extract, process, or recover lithium for years 2022 through 2024. However, because both bills affect the same section of CAEATFA's statute (Public Resources Code, Section 26001.8), the bill signed last (AB 209) chaptered out the bill signed first, and only the additional \$15 million in STE for lithium extraction projects was added to statute. CAEATFA held an application period for the 2022 lithium allocation from October 3 – October 14 and did not receive any new applications. On December 13, 2022, the CAEATFA Board awarded the full \$15 million to one eligible waitlisted applicant.

Applications Approved

The Authority approved 25 projects in 2022 for a total dollar amount of \$1,352,941,176.47 in qualified property purchases, estimated to result in \$115 million in STE.¹⁰

Project Locations and Anticipated Benefits

The 2022 approved projects are located in 16 counties throughout California. It is expected that these projects will provide economic benefits to the state and local jurisdictions in the form of corporate taxes, personal income taxes, sales and property tax revenues, increased employment, and additional economic activity created by the manufacturing facilities and purchases from related suppliers.

Based on the net benefits methodology embodied in the STE Program regulations and on representations from these applicants, the Authority estimates the applications approved in 2022 are anticipated to result in estimated combined environmental benefits valued at approximately \$114.7 million and fiscal benefits valued at approximately \$313.8 million over the lifetime of the projects. Together, these projected environmental and fiscal benefits will result in approximately \$312.6 million in estimated net benefits over the lifetime of the projects. See Table 1, below, for a breakdown of the various projects and anticipated benefits by county.

¹⁰ STE value includes the last 2021 application that received partial STE from 2022.

TABLE 1: STE APPROVED PROJECTS BY COUNTY IN 2022¹¹

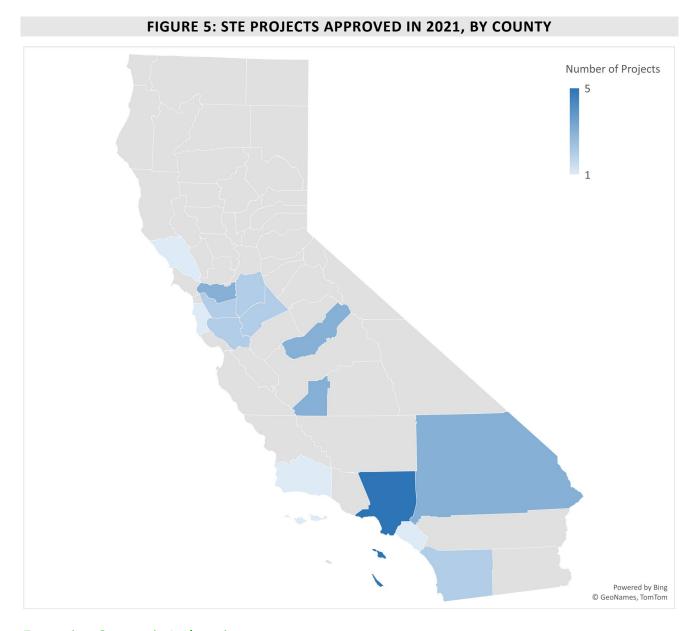

County ¹²	Number	Amount of Anticipated Qualified Property Purchases	Projected STE Amount	Estimated Fiscal Benefit Value	Estimated Environmental Benefit Value ¹³	Estimated Quantifiable Net Benefit Value	Total Jobs	Total Jobs Attributed to the STE
Alameda	2	\$47,250,000	\$4,016,250	\$18,538,293	\$341,858	\$14,863,901	3,632	60
Calaveras	1	\$17,030,696	\$1,447,609	\$1,719,760	\$2,938,804	\$3,210,955	38	6
Colusa	1	\$123,720,000	\$10,516,200	\$8,953,287	\$16,365,146	\$14,802,234	307	37
Contra Costa	1	\$195,834,945	\$16,645,970	\$37,500,207	\$53,648,295	\$74,502,532	677	42
Fresno	1	\$72,555,098	\$6,167,183	\$7,674,817	\$11,854,892	\$13,362,525	132	19
Imperial	4	504,244,467	\$42,837,830	\$83,421,639	\$9,769,973	\$50,353,782	1,402	183
Kern	1	\$23,500,000	\$1,997,500	\$5,920,554	\$0	\$3,923,053	298	10
Los Angeles	4	\$98,772,615	\$8,395,672	\$29,229,679	\$13,497,790	\$34,331,796	923	41
Sacramento	1	\$23,089,719	\$1,962,626	\$3,333,560	\$48,106	\$1,419,039	54	5
San Bernardino	1	\$8,354,110	\$710,099	\$861,039	\$0	\$150,939	321	31
San Diego	1	\$23,150,000	\$1,967,750	\$7,036,749	\$0	\$5,068,999	1,411	42
San Joaquin	1	\$6,795,730	\$577,637	\$4,096,277	\$0	\$3,518,640	75	5
San Mateo	1	\$8,490,000	\$721,650	\$671,440	\$0	-\$50,210	72	6
Santa Clara	3	\$164,690,353	\$13,998,681	\$82,391,292	\$3,682,085	\$72,074,696	1,247	636
Stanislaus	1	\$22,703,169	\$1,929,769	\$12,866,848	\$2,539,767	\$13,476,845	36	1
Tulare	1	\$23,400,000	\$1,989,000	\$9,596,583	\$0	\$7,607,583	278	8
<u>Total</u>	25	\$1,363,580,902	\$115,881,426	\$313,812,024	\$114,686,716	\$312,617,309	10,903	1,132

¹¹ Projected STE amounts and estimated benefits may not add up precisely due to rounding. Additionally, the total amount of STE does not add up precisely to \$115 million as the last 2021 application (Enovix Corporation) that received partial STE from 2022 was not included, and the last 2022 general pool application (West coast Waste Co., Inc.) that received partial STE from 2023 was included.

¹² There are applicants with multiple project sites. For purposes of this table, the data was applied to the primary county.

¹³ The environmental benefits for Advanced Manufacturing projects are not monetized in the application scoring process as they are with Alternative Source and Advanced Transportation projects. Instead, points are given for specific environmental process improvements, such as reductions in energy and water consumption, solid and hazardous waste, and air and other pollutants.

Figure 5 shows a geographical representation of all projects approved under the STE Program in 2022.

Emerging Strategic Industries

On November 16, 2021, the Executive Director issued a list of Emerging Strategic Industries pursuant to Section 10031(m) of the program's regulations. These industries include activities associated with the development, exploration, and production of lithium within California's "Lithium Valley" that the Executive Director has identified as having a potentially significant impact on the State's

environmental goals or economy, the advancement of which are in the public interest, and which advance the purposes of the program.

TABLE 2: LIST OF EMERGING STRATEGIC INDUSTRIES

Product	NAICS Code
Lithium compounds	325180
Geothermal steam	221330
Lithium batteries, storage	335911
Lithium batteries, primary	335912

In 2022, five projects qualified under the Emerging Strategic Industries designation, totaling approximately \$538 million in qualified property for an estimated STE value of \$45.7 million (which includes the additional \$15 million lithium extraction allocation) across three different counties. This consists of two lithium recovery and processing projects, two lithium battery manufacturing projects, and one geothermal steam production project.

CALIFORNIA HUB FOR ENERGY EFFICIENCY FINANCING PROGRAMS

Program Summary

The State of California has ambitious goals to reduce greenhouse gas (GHG) emissions and address climate change. In 2006, the Legislature passed the California Global Warming Solutions Act (Assembly Bill 32), which created a comprehensive, multi-year program to reduce GHG emissions in California. In the subsequent Scoping Plans, intended to describe the approach California will take to reduce GHGs, one of the primary methods identified was increasing efficiency in existing buildings. Senate Bill 350 (De Léon, 2015) later called for doubling energy efficiency in existing buildings by 2030. ¹⁴ Billions of square feet of existing commercial and residential properties—both the structures themselves and the energy-using equipment they house—are currently in need of energy upgrades. There is simply not enough government or ratepayer funding to pay for these upgrades.

Background

The California Public Utilities Commission (CPUC) Decision (D.) 13-09-044 authorized a series of financing programs, designed to attract private capital to finance energy efficiency upgrades, and established the California Hub for Energy Efficiency Financing (CHEEF). The CPUC requested that the California Alternative Energy and Advanced Transportation Financing Authority (CAEATFA) assume the administration of the CHEEF programs and directed the Investor Owned Utilities (IOUs) and CPUC staff to assist CAEATFA with implementation.

The CHEEF's financing programs have incentivized private finance companies to improve terms and expand credit criteria for the financing of energy efficiency projects by providing a credit enhancement via a loss reserve funded with IOU ratepayer funds earmarked for public programs. This credit enhancement helps remove the upfront cost barrier for Californians to undertake energy efficiency retrofits and leverages private capital to provide customers with access to affordable, attractive financing options.

The financing programs will be evaluated according to the CPUC goals that the solutions should:

- (1) Be scalable;
- (2) Leverage private capital to support energy efficiency upgrades;
- (3) Reach underserved Californians who would not otherwise have participated in energy efficiency upgrades; and
- (4) Produce energy savings.

¹⁴ Achieving comprehensive and cost-effective energy efficiency in all existing buildings is state policy, and one of three primary approaches to meet California's aggressive energy and environmental targets [e.g., Senate Bill 100 (De Léon, 2018), Senate Bill 32 (Pavley, 2016), Assembly Bill 802 (Williams, 2015), Senate Bill 350 (De Léon, 2015), Assembly Bill 758 (2009, Skinner), Assembly Bill 32 (Nunez, 2006)].

CAEATFA works with the CPUC, IOUs, finance companies, energy efficiency retrofit contractors, and several key vendors to develop and manage the series of energy efficiency financing programs. The financing programs developed and launched through the CHEEF, known collectively as the *GoGreen Financing Programs*, include:

- GoGreen Home Energy Financing (formerly the Residential Energy Efficiency Loan Assistance Program, or REEL), which provides financing for energy efficiency upgrades in residential properties for owners and renters of single-family homes, townhomes, condominiums, and mobile and manufactured homes
- GoGreen Business Energy Financing (formerly the Small Business Energy Efficiency Financing Program, or SBF), which provides financing for energy efficiency upgrades in commercial businesses and nonprofits through a variety of financing products, including equipment leases and energy savings agreements
- GoGreen Affordable Multifamily Energy Financing (formerly the Affordable Multifamily Energy Efficiency Financing Program, or AMF), which provides financing for energy efficiency upgrades in affordable, deed-restricted multifamily properties of 5 or more units where at least 50% of units are income restricted

TABLE 3: CHEEF PROGRAMS AT A GLANCE

GoGreen Home

Customers: Single family homes, owners or tenants (incl condos, multiplexes, and mobile homes)

Financing Options:

- Loans from \$1,000 to \$50,000
- Current rates: 2.98%-9.00%
- Standard loans and appliance microloans available

GoGreen Business

Customers: Small businesses and nonprofits, building owners or tenants

Financing Options:

- Loans, leases, and efficiency service agreements from \$5,000 to \$5 million with option for on-bill repayment
- Complements IOU On-Bill Financing program

GoGreen Multifamily

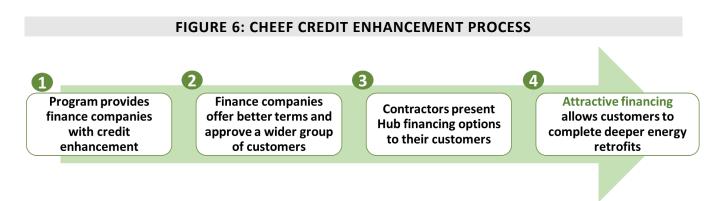

Customers: Multifamily properties where at least 50% of units are restricted to LMI households

Financing Options:

 Equipment finance agreements from \$10,000 to \$250,000 and efficiency service agreements from \$250,000 to \$10 million

Interest rates cited for GoGreen Home are as of 3/2/23

The Credit Enhancement

The GoGreen Financing programs under the CHEEF use a credit enhancement in the form of a loss reserve to support leveraging of private capital and expand access to financing for borrowers. In exchange for the credit enhancement, private finance companies are able to **offer better terms** and **approve more customers**.

Better terms for customers include lower rates, larger financing amounts, and longer repayment periods, which in turn lead to lower monthly payments. The credit enhancement also allows private finance companies to expand access to financing to Low-to-Moderate Income (LMI) and credit-challenged borrowers, including renters, tenants, and mobile home residents. Within GoGreen Business, newer businesses and tenant occupants are able to qualify.

How GoGreen Financing Addresses Barriers

There are a significant number of barriers and challenges within the energy efficiency financing market, and GoGreen Financing works to address them through program design features, structure and targeted outreach. These barriers include limited access to private capital for financially underserved borrowers, the upfront cost of engaging in efficiency upgrades, and the complexities involved with lending to customers and businesses with complex debt stacks.

The CHEEF addresses these challenges in targeted actions and through its program design, as described below:

TABLE 4: MARKET BARRIERS AND CHEEF SOLUTIONS

Market Barrier	The CHEEF's Solution		
	100% financing availableBroader access to capital and improved financing terms		
Owner/tenant split incentives	Renters and tenants allowedFinancing not secured by the property		
Complex (and sometimes slow) rebate and incentive process	 Projects don't require use of rebates or incentives Quick private lender financing approval Contractor prefunding and progress payments available Flexibility: 30% of financing can be nonenergy measures, such as landscaping or remodeling 		

Market Barrier	The CHEEF's Solution
Borrowers have complex debt structure	 Multiple financing structures available, including the potential for off-balance sheet treatment
Customers are too busy to undertake retrofits	 Program trains contractors to help remove complexity Established role for project developers to help coordinate and guide commercial projects Collaboration with IOUs to strengthen market impact and fill gaps Statewide marketing to help raise awareness
Consumer protection	 Program establishes minimum criteria for lenders and trains enrolled contractors on the program requirements Desktop reviews and post-project site inspections Lenders expand terms while maintaining underwriting standards
Financially underserved borrowers	 Program meets the borrowers where they are – single, to-code, and self-install measures are available, as well as comprehensive projects Program design has flexibility to address traditionally underserved customers: renters, tenants, mobile homes, new businesses, LMI borrowers Marketplace microloan provides underserved borrowers with a lower-interest alternative to credit cards for appliances purchased on utility marketplaces

Benefits to Stakeholders

The CHEEF's credit enhancement, approach to market barriers, and overall program structure lead to a number of key benefits for financing stakeholder groups, including the State of California.

	TABLE 5: CHEEF BENEF	ITS TO STAKEHOLDERS	
Customers	Contractors	Lenders	California
 ✓ Lower energy usage ✓ Better financing terms ✓ Lower monthly payments ✓ 100% financing, no property lien 	 ✓ Deeper retrofits ✓ Larger scopes of work ✓ Support from statewide marketing ✓ Online listing helps attract new customers 	 ✓ Mitigate risk through the loss reserve ✓ Approve wider range of borrowers ✓ Enter new markets and asset class 	 ✓ More energy saved in communities across the state ✓ Benefits of energy savings extended to underserved borrowers

Report Activity

GoGreen Financing Updates

In 2022, amid encouraging organic growth for the residential and business programs, CAEATFA continued to lay the foundations for greater impact and scalability through program simplification, expansion, and the strategic adoption of scalable processes.

In spring, CAEATFA made important strides toward simplifying the GoGreen Home Energy Financing Program (GoGreen Home) when it reached an agreement with Energy Solutions, the implementer of the TECH Clean California Initiative, to provide the first source of non-IOU Public Purpose Program ratepayer funding for GoGreen Home credit enhancements. The funding supports credit enhancements and administrative costs for borrowers who receive gas service from an IOU and electric service from a Publicly Owned Utility (POU). The 8 million Californians who fall into this category previously faced fuel source-related restrictions on using GoGreen Home; beginning in April 2022, these customers became eligible to use GoGreen Home for energy upgrades regardless of fuel source, enabling them to fully participate in decarbonization efforts through the financing of heat pump technologies and a full suite of electric efficiency measures.

Also in spring 2022, CAEATFA announced the launch of on-bill repayment (OBR) functionality for the GoGreen Business Energy Financing Program (GoGreen Business). Currently available in SoCalGas, Southern California Edison and San Diego Gas & Electric territories, OBR functionality is an attractive feature for businesses that increases convenience by enabling borrowers to repay their private capital financing directly through their utility bill. CHEEF's OBR infrastructure is believed to be the first in the country to facilitate secure payments between multiple utilities and multiple lenders, a highly complex undertaking. Staff expects OBR to be available to customers in Pacific Gas & Electric territory in 2023.

CAEATFA also submitted a proposal via Track 2 of the CPUC's Clean Energy Financing Proceeding requesting authorization to expand the Programs to offer financing for comprehensive clean energy technologies and to begin serving large commercial and public buildings. The ability to finance

comprehensive clean energy technologies beyond energy efficiency and demand response, potentially including solar, battery storage, and EV charging, will allow the GoGreen Financing Programs to better support the state's goals of decarbonization and grid resiliency. Large commercial and public buildings would be able to benefit from the use of OBR functionality and enable CAEATFA to serve the municipal, university, schools and hospitals (MUSH) sector with needed access to financing.

In 2022, the GoGreen Financing Programs onboarded both a new Contractor Manager and a new Marketing Implementer to manage outreach and marketing to contractors and consumers. Following a competitive bidding process, the Electric & Gas Industries Association (EGIA) began work in Q2 as the Contractor Manager under a contract with CAEATFA. Full-service marketing firm RIESTER took over marketing operations in Q3 under a contract with Southern California Gas following a selection process that included the full participation of CAEATFA and the IOUs.

GoGreen Home Energy Financing (GoGreen Home)

CAEATFA serves California's single-family residential sector through the GoGreen Home Energy Financing Program. GoGreen Home provides exceptional financing options to owners and renters of existing residential properties who select from a broad list of energy efficiency measures intended to reduce energy consumption. Customers may upgrade a single-family home, townhome, condo, duplex, triplex, fourplex or manufactured home. Renovations for up to four units can be bundled into the same loan.

The Impact of the Credit Enhancement

The provision of a credit enhancement is at the heart of the CHEEF's financing program design. As a result of the loan loss reserve, GoGreen Home lenders have made improvements to their existing underwriting criteria that greatly benefit potential borrowers.

The credit enhancement mitigates risk for lenders by functioning as an insurance pool; in the event of customer default, lenders may file a claim and recover up to 90% of the remaining loan value from the fund. In exchange for this risk mitigation, the program's participating lenders offer lower interest rates, longer terms and broader underwriting criteria to GoGreen Home customers than they otherwise would.

GoGreen Home lenders receive a credit enhancement of 11% of the claim eligible amount, or 20% if the borrower is considered underserved. Data regarding the number of underserved borrowers receiving GoGreen Home loans is discussed below.

The Impact of GoGreen Home: Standard Loans

GoGreen Home's microloan product is reported on page 20. The data in the section below only includes standard loans enrolled through one of GoGreen Home's eight credit union lenders.

In 2022, the GoGreen Home Program accelerated its trend of annual growth, closing the year after enrolling 1,091 loans worth more than \$20 million in financing. This represents a 68% increase in number of loans and an 80% increase in the dollar amount financed compared with 2021. Loans enrolled in GoGreen Home since program inception in 2016 totaled 2,800 by the end of 2022, for a

total amount financed of more than \$49 million. For every \$1 of credit enhancement funds allocated, \$6.41 in private capital has been leveraged through GoGreen Home.

The most commonly installed energy efficiency measures in 2022 were HVAC equipment and ductwork, windows, insulation, and cool roofs. The number of decarbonization projects financed through GoGreen Home rose significantly, with 249 projects over the course of the year compared with 58 in 2021 (a 347% increase). The average size of a GoGreen Home loan in 2022 was \$18,596, and 85% of loans were "finance only," meaning the borrower or contractor did not apply a rebate or incentive to the cost of the project.

Eight credit union lenders participate in the Program. Borrowers could choose from 652 participating contractors across the state to install their GoGreen Home project.

Over the course of 2022, 17 total loans were charged off, bringing to 38 the total number of charge-offs since Program inception (1.4% of all loans enrolled). These loans have resulted in \$353,676 in net credit enhancement funds being expended to cover a share of the lenders' losses. ¹⁵

credit enhancement funds being expended to cover a share of the lenders' losses. 15

Figure 7 shows the growth of GoGreen Home since its inception in 2016.

The GoGreen Home regulations define underserved borrowers as those whose property is located in a Low-to-Moderate Income (LMI) census tract, whose household income is LMI, or who have a credit score below 640. As described above, GoGreen Home lenders receive a credit enhancement of 20% of the claim eligible amount financed if the borrower is considered underserved.

Financing for Underserved Californians

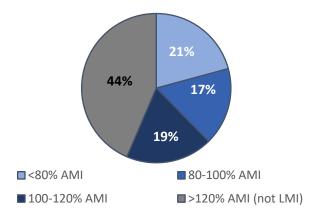

¹⁵ Net credit enhancement funds expended is calculated as Claims Paid less Recoveries.

Nearly three in five (57% of total) loans enrolled and 53% of dollars financed in 2022 were made to upgrade properties in LMI census tracts. Of those loans:

- 21% of property upgrades were made in census tracts with an average income <80% of the Area Median Income (AMI);
- 17% of upgrades were in census tracts with an average income 80-100% of AMI; and
- 19% of upgrades were in census tracts with an average income 100-120% of AMI.

Roughly one-tenth (11%) of loans made in 2022 were to upgrade properties in Disadvantaged Communities as measured by CalEnviroScreen¹⁶. Since Program inception, 15% of GoGreen Home loans have been made to upgrade properties in Disadvantaged Communities per CalEnviroScreen score, and 57% of loans have been made to LMI borrowers.

FIGURE 8: LOANS MADE TO UPGRADE PROPERTIES BY CENSUS TRACT INCOME (ALL-TIME)

The Impact of TECH Funding for Credit Enhancements

As reported above, in April 2022 an agreement reached between CAEATFA and the TECH Clean California Initiative implementer made TECH funds available for credit enhancements of heat pump technologies and other electric equipment in publicly owned utility (POU) territories where customers receive gas service from an IOU. Between April and the end of 2022, TECH funds helped credit enhance 53 loans worth \$1,144,850; these included installation of 54 pieces of equipment that use heat pump technology. Of the 53 loans utilizing TECH funding, 25 loans totaling \$443,249 were creditenhanced by TECH funds alone, meaning they could not have been financed through GoGreen Home otherwise.

TECH funding for credit enhancements is an important part of CAEATFA's decarbonization support strategy. While TECH-funded projects in POU territories do not comprise the majority of heat pump-related loans in the GoGreen Home portfolio (the Program financed 249 heat pump projects in 2022), electric POUs are natural advocates for decarbonization and therefore natural partners for CAEATFA with regard to decarbonization efforts. With the growing public awareness of heat pump technologies, and with federal tax credits and new and relaunched statewide rebates coming online

¹⁶ (<u>https://oehha.ca.gov/calenviroscreen</u>) Figures in this report are for borrowers in the top quartile of pollution-burdened census tracts.

in 2023, CAEATFA staff looks forward to continuing its work with eligible electric POUs to help more Californians decarbonize their homes.

Statewide Financing

GoGreen Home has made loans to borrowers in 47 counties. Figure 9 shows the number of GoGreen Home loans enrolled, by county, from the start of the program through the end of 2021.

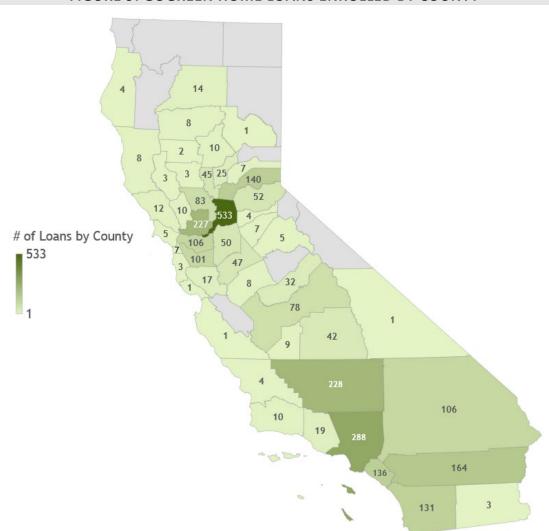

FIGURE 9: GOGREEN HOME LOANS ENROLLED BY COUNTY

Microloans Now Available through GoGreen Home

In the first half of 2022, CAEATFA continued to work with One Finance and its channel partner, Enervee, to bring GoGreen Home's attractive financing to online point-of-purchase sales of energy efficient appliances on select utility marketplaces. Microloan financing launched on the Southern California Gas Marketplace in August 2021 and was paused in June 2022 to allow Enervee to onboard a new lender. Financing is expected to resume on the SoCalGas marketplace and to launch on the Southern California Edison marketplace in early 2023.

During the first six months of 2022, until activity was paused, GoGreen Home facilitated financing for 259 microloans; the average loan size was \$1,561 for a total of \$404,389. The total financed since

Program inception in August 2021 is 496 microloans, with an average loan size of \$1,463 for a grand total of \$725,579. Of the microloans financed through the Program, 42 have been charged off and 38 have been paid in full; 416 remain outstanding.

Next Steps

CAEATFA continues to address operational barriers to help scale GoGreen Home and bring the Program to the next stages of its growth. Some of the efforts anticipated to take place in 2023 will include:

- Working to onboard high-volume lenders who have the capacity to help the Program scale
- Launching an online loan and project management system to streamline the project eligibility screening and loan enrollment process for contractors and lenders
- Continuing to investigate non-IOU sources of funding to support the expansion of GoGreen
 Home in POU and municipal electricity provider territories, and potentially for the credit
 enhancement of comprehensive clean energy technologies, pending CPUC authorization
- Re-launching of marketplace microloan financing in Southern California Gas territory and launching in Southern California Edison territory

GoGreen Business Energy Financing (GoGreen Business)

The GoGreen Business Energy Financing Program launched in 2019. GoGreen Business was designed to address multiple challenges to energy efficiency retrofits in the small business sector, including the lack of time and capital business owners are able to put towards energy upgrades, the limited access to attractive financing options for small businesses (which are often viewed as greater credit risks by finance companies), and the mixed incentives for property owners and tenants.

Small business owners and nonprofits, whether they own or rent the business property, are eligible for GoGreen Business. The program defines "small businesses" as those that meet at least one of the following size criteria:

- 100 or fewer employees
- \$15 million or less in annual revenue
- Alignment with the SBA definition of "small business" based on NAICS code (up to \$41.5 million in annual revenue, depending on industry)

The GoGreen Business Credit Enhancement

GoGreen Business offers a credit enhancement to improve access to private capital for small business energy efficiency projects. The first qualifying \$1 million of each GoGreen Business project is credit enhanced as follows:

- The first \$50,000 of each financing agreement is credit enhanced at 20%
- The remainder (up to an additional \$950,000) is credit enhanced at 5%
- Maximum loss reserve contribution per project is \$57,500

Financing Instruments

The private finance companies that participate in GoGreen Business offer several financing options beyond traditional loans that address the financing needs of small businesses. This variety of products has already drawn interest in the program. The financing instruments available to borrowers through GoGreen Business include:

- Loans Customer takes ownership of measures
- Equipment Leases/Equipment Finance Agreements
 - Customer gets use of measures
 - Title can transfer at end of lease term or at the beginning of term (Equipment Finance Agreement)
- Efficiency Service Agreements
 - o Finance company installs measures on behalf of the customer
 - o Regular, ongoing service and maintenance of measures is provided to the customer
 - o Title does not transfer to the customer
 - Guarantee of functionality of measures or guarantee of energy savings
 - Customer is cash flow-positive from day one

Program Design

GoGreen Business was designed to fill gaps and complement financing options available for small businesses, including C-PACE and the IOUs' On-Bill Financing (OBF) programs. The 2022 launch of On-Bill Repayment (OBR) functionality for GoGreen Business (details below) makes it a more effective and attractive complement to these existing programs, in particular OBF. The program's design takes into consideration several factors that are unique to the small business market:

- The program fills a niche for small business customers in that it complements existing IOU-provided rebates and incentives, as well as the IOUs' OBF programs. Financing through GoGreen Business can be used for customers who do not qualify for OBF due to insufficient bill payment history, for installations which don't meet IOU requirements such as rebates or bill neutrality, and for financed amounts greater than the capped amounts of OBF. CAEATFA staff work together with the IOUs to promote GoGreen Business and its ability to serve as an alternative to or in combination with existing programs, especially as the IOUs contract with third-party implementers to offer energy efficiency programs in the commercial sector.
- Motivations for completing energy upgrades among small businesses are different from those of residential customers. Small businesses need direct outreach from an energy efficiency program or local contractor to explain the benefits of energy upgrades and guide them through the process.
- GoGreen Business prioritizes flexibility in its offerings, both in terms of eligible energy-saving measures and available financing options. Measures can qualify through multiple pathways, including a custom method, and projects may finance code-required repairs and other nonenergy components. The multiple financing options offered by the participating finance companies, such as leases and efficiency service agreements, are also attractive.

Program Activity in 2022

New financing activity improved for GoGreen Business in 2022 over previous years but remained limited. Ten new projects worth a combined financed amount of \$683,451 were enrolled in the Program. The borrowers, representing a range of industries, included a public relations firm, a brewery, a sail manufacturer, a resort, and a small chain of sandwich shops. The new enrollments brought the total number of financing agreements enrolled since Program inception to 20 and the total amount financed to \$2,365,302.

Several years' effort came to fruition in 2022 with the spring launch of On-Bill Repayment (OBR) functionality in three IOU territories (Southern California Gas, Southern California Edison and San Diego Gas & Electric), with availability in Pacific Gas & Electric territory expected in 2023. The first GoGreen Business project to utilize OBR functionality was enrolled in August 2022.

Staff is hopeful that the availability of OBR will help spur Program uptake in the future. OBR functionality is a convenient feature for businesses that enables borrowers to repay their private capital financing directly through their utility bill. It also makes GoGreen Business a more attractive complement to the IOUs' On-Bill Financing product, primarily because the Program is able to offer comparatively fast project approvals. Three finance companies currently offer OBR.

Three of the GoGreen Business projects enrolled in 2022 benefitted from a pilot interest rate buy-down (IRBD) promotion designed to encourage enrolled GoGreen Business contractors to present financing as an option for their customers. Launched in 2021, the IRBD ran through May 2022 and allowed customers to receive interest rates as low as 0%, with the most effective use of the promotion being for projects under \$25,000.

Seven participating finance companies offer financing through the Program, including three — Prime Capital, Verdant Commercial Capital and Travis Credit Union — that joined in 2022. Ninety-nine contractors and project developers were enrolled in GoGreen Business at the end of 2022.

Next Steps

CAEATFA continues working on outreach to finance companies, project developers and contractors in an effort to establish momentum for GoGreen Business. Efforts planned for 2023 include:

- Implementation of a multi-year IRBD promotion to spur Program uptake. In 2021, CAEATFA received authorization to spend up to \$1.35 million across all three GoGreen Financing Programs for IRBD marketing promotions through June 30, 2027. A GoGreen Business IRBD promotion will begin being administered by RIESTER, the Program's new marketing implementer, in early 2023.
- Implementation of OBR functionality in PG&E territory
- Launch of a microloan financing product for projects up to \$5,000 in Southern California
- Revitalization of contractor recruitment and engagement efforts to bolster the Program's contractor network
- Expanding the Program to incorporate large commercial and public property types and comprehensive clean energy measures

GoGreen Affordable Multifamily Energy Financing (GoGreen Multifamily)

The GoGreen Affordable Multifamily Energy Financing Program targets a critical but hard-to-reach element of the state's existing building stock: multifamily buildings and complexes that house low-income Californians. The program finances energy efficiency upgrades for multifamily properties of five or more units, where at least 50% of units are income-restricted at low-to-moderate (defined as up to 120% of Area Median Income). To be eligible for the program, properties must remain affordable for at least five years.

GoGreen Multifamily is designed to complement existing multifamily energy programs, specifically the Low-Income Weatherization Program (LIWP) administered by the State's Department of Community Services and Development, and the Solar On Multifamily Affordable Homes (SOMAH) program administered by the CPUC via a competitively selected team of nonprofit organizations. LIWP offers a generous incentive to qualifying affordable multifamily properties that install energy efficiency upgrades, and SOMAH requires the completion of an energy audit before issuing an incentive to install solar. CAEATFA specifically designed GoGreen Multifamily to work with these existing programs by offering its attractive financing for the portion of the measures not otherwise incentivized to help address gaps.

GoGreen Multifamily is able to finance a broad array of energy efficiency measures, as well as any energy efficiency measure approved for rebate and incentive by any IOU, Renewable Energy Network or Community Choice Aggregator. Non-energy measures may also be financed.

Key program features include:

- No minimum or maximum loan size
- The first \$1 million of each loan will be credit enhanced at 15% of the claim-eligible amount
- Fixed or variable rates allowed
- No underwriting requirements imposed on the finance company; underwriting is based on participating lenders' requirements

Progress and Outreach

CAEATFA launched GoGreen Multifamily in mid-2019 and quickly enrolled its first participating finance company, Renew Energy Partners, offering savings-based payment agreements for project amounts of \$250,000 to \$10 million. In 2020, Ascentium Capital joined as the second participating finance company in the Program, offering financing for projects between \$10,000 and \$250,000.

Thus far, no property owners have used GoGreen Financing to upgrade their properties. CAEATFA staff believe this is due to a number of challenges in the affordable multifamily space: there is a significant amount of time and owner bandwidth needed to develop affordable multifamily energy projects, technical assistance is needed, affordable property owners are legally limited in their ability to recoup savings from in-unit upgrades, property owners must navigate complex debt structures to engage in new projects, and projects must satisfy very tight cash-flow requirements.

In March 2022, CAEATFA launched an IRBD marketing promotion for GoGreen Multifamily offering interest rates as low as 0% for qualifying projects, with funds to be reserved by June 30. The promotion, planned following CPUC authorization in 2021 for CAEATFA to consider additional

financing mechanisms, was designed to test whether reducing the interest rate barrier would allow some projects to succeed. One customer, a complex in Santa Monica, reserved funds for a heat pump installation project but had to withdraw due to unanticipated expenses and delays associated with the project. The experience suggests that even interest rates reduced beyond the credit enhancement are not enough to encourage financing in this sector, as these properties face too many other challenges in their journey to finance retrofits.

Staff continued engaging with affordable multifamily property owners, land trusts, government programs, and industry stakeholders in search of projects that might benefit from affordable financing. Staff also attended conferences and convenings to promote GoGreen Multifamily and learn about challenges facing the affordable multifamily housing sector, including the California Climate and Energy Forum.

Next Steps

Hurdles to completing energy efficiency upgrades in the affordable multifamily sector remain, and CAEATFA expects to see lengthy project timelines and challenges for properties in this sector pursuing projects throughout the duration of this program, despite continued engagement with Program partners.

Nonresidential Program

The Nonresidential Program, initially authorized through CPUC Decision 13-09-044, was designed to encourage energy efficiency financing for public entities, large businesses and nonprofits, and municipalities, universities, schools, and hospitals (MUSH) market properties. Unlike the other CHEEF Programs, it did not include a credit enhancement as originally conceived; rather, the benefit offered by the Nonresidential Program was planned to be On-Bill Repayment (OBR) functionality. Launch of the Nonresidential Program was therefore dependent upon the development and launch of OBR.

At the end of 2019, the Nonresidential Program had not been actively developed. Since CPUC Decision 17-03-026 required all pilots to be launched by the end of 2019, and since OBR was not yet developed, CAEATFA staff directed resources toward the launch and operations of the CHEEF's other Programs.

In 2022, following the launch of OBR functionality, CAEATFA requested authorization via Track 2 of the CPUC's Clean Energy Financing Proceeding to re-launch efforts to develop this Program and allow large commercial and public entities to access GoGreen Financing. A response from the CPUC is anticipated in the first half of 2023.

On-Bill Repayment (OBR)

On-Bill Repayment (OBR), whereby a borrower repays energy efficiency financing from a private lender through their utility bill, is viewed by the CPUC as a critical component of the CHEEF Programs as it has the potential to both encourage program uptake and reduce default rates.

In 2022, CAEATFA, in partnership with the IOUs and its Master Servicer, completed the development and initial implementation of OBR functionality for GoGreen Business. OBR functionality successfully launched in three IOU territories: San Diego Gas & Electric, Southern California Edison, and Southern

California Gas. The first project leveraging OBR functionality was enrolled in the Program in August 2022.

In 2023, CAEATFA staff will continue working with Pacific Gas & Electric to operationalize its OBR platform.

Outreach

Consumer outreach – In 2022, the Statewide Marketing Implementer contract for the GoGreen Financing Programs was awarded by Southern California Gas to RIESTER, a full-service marketing firm, following a selection process that included the full participation of CAEATFA and the IOUs. RIESTER assumed marketing responsibilities in Q3 and set about establishing infrastructure and processes, assessing needs for the website, and planning a robust consumer marketing campaign to launch in January 2023.

GoGreenFinancing.com is the consumer-facing website for all CHEEF programs, where potential borrowers can learn about the types of energy efficiency projects available to implement, find local contractors who can install the measures, and explore the financing options provided by lenders. It is the platform through which most GoGreen Financing customers interact with the Program (those referred directly by contractors may use different channels). Traffic to the site remained strong in 2022 even though marketing efforts were largely focused on the transition to RIESTER, with 193,000 sessions resulting in 11,048 customer referrals made to participating lenders (a 61% increase in referrals over 2021). The performance is likely due to several factors: a spring digital marketing campaign launched by the previous marketing implementer, several summer and autumn campaigns by IOUs, and a late autumn digital and search campaign by RIESTER.

CAEATFA looks forward to 2023 and a reinvigorated web and digital presence for GoGreen Financing.

Contractor Outreach – Outreach to new and already enrolled GoGreen Home and GoGreen Business contractors continued in 2022 through the efforts of CAEATFA's Contractor Manager, EGIA. Contractors received monthly emails promoting the Program and its features as well as invitations to webinars on such topics as how to combine GoGreen Financing with TECH rebates and how to offer and help customers apply for OBR. CAEATFA staff also participated in the Institute of Heating and Air Conditioning Industries (IHACI) Trade Show in Pasadena. By the end of 2022, borrowers could choose from 652 GoGreen Home contractors and 99 GoGreen Business contractors and project developers.

IOU Customer Outreach – While the transition to the new marketing implementer was the main marketing focus in 2022, the IOUs engaged in several marketing campaigns through their regional channels, including digital communications through e-mail and social media and updates to their financing webpages.

PROPERTY ASSESSED CLEAN ENERGY (PACE) LOSS RESERVE PROGRAM

Program Summary

Property Assessed Clean Energy (PACE) allows local jurisdictions to finance renewable energy installations, energy and water efficiency retrofits, and electric vehicle charging infrastructure by issuing bonds that are repaid by participating property owners through their property tax assessments. The PACE Loss Reserve Program (the Program) was authorized in September 2013 to assist residential single family PACE financing by helping to increase its acceptance in the marketplace.

Legislative Background

PACE initially launched in 2008 as a financing mechanism for energy efficiency and renewable retrofits. However, on July 6, 2010, the Federal Housing Finance Agency (FHFA) issued a pronouncement that PACE programs "present significant safety and soundness concerns" and violated standard mortgage provisions since PACE tax liens have priority over any other loan or mortgage. The concerns expressed by FHFA caused the majority of the residential PACE programs throughout the country to be placed on hold at that time, including many of the existing residential PACE programs in California.

In response to FHFA's concerns and to further support the development of PACE in California, Senate Bill 96 (Committee on Budget and Fiscal Review, Chapter 356, Statutes of 2013) authorized CAEATFA to develop and administer the PACE Loss Reserve Program to mitigate risk to first mortgage lenders and collect data to better quantify actual risk, while helping the State reach its energy efficiency and renewable goals by supporting residential PACE. The PACE Loss Reserve was funded with an initial allocation of \$10 million.

Program Design

The goal of the Program is to put first mortgage lenders in the same position as they would have been without the PACE lien on the property. The PACE Loss Reserve makes first mortgage lenders whole for any direct losses incurred due to the existence of a PACE lien on a property. To that end, the Loss Reserve covers the following losses:

- (1) PACE payments made while a first mortgage lender is in possession of a property subject to a PACE assessment.
- (2) Any losses to the first mortgage lender up to the amount of outstanding PACE assessments in a forced sale for unpaid taxes or special assessments.

PACE administrators may participate in the Program by applying to CAEATFA and demonstrating that they meet the Program's minimum underwriting criteria as established in statute and regulation.

Once enrolled, each eligible financing originated by an enrolled PACE administrator and included in its semi-annual reports may be covered by the Loss Reserve for its full term, or until the Loss Reserve is exhausted. Additionally, PACE administrators that applied to the Program on or before June 9, 2014 were allowed to enroll their existing portfolios under the Loss Reserve to maximize the Program's effectiveness. To allow new PACE programs (created on or after March 10, 2014) to enroll in the Program without delaying their operations, the Loss Reserve also covers financings originated up to 30 days before their enrollment date.

Enrolled PACE administrators must report to CAEATFA on the size and status of their portfolios in March and October of each year. Each report includes detailed information on the financings issued during the reporting period, including the assessor's parcel number, principal amount, annual assessment amount and term. The October reports also include information on the size and value of the cumulative financing portfolio and information on energy and water savings resulting from the funded projects, to the extent that information is available.

Participating PACE Programs

As of December 31, 2022, 22 PACE programs have participated in the PACE Loss Reserve Program and only four were still active.

Table 6, below, shows all of the PACE programs enrolled each year.

Report on 2022 Activity

PACE Financing Portfolio

During initial program enrollment in June 2014, the eight participating PACE programs enrolled 17,401 PACE financings with a total principal value of over \$350,000,000. To date, the Loss Reserve covers 98,395 PACE financings with a total outstanding principal value of approximately \$2.4 billion.

In 2022, CAEATFA enrolled 3,592 new PACE financings with a total principal value of \$141,484,873.24.

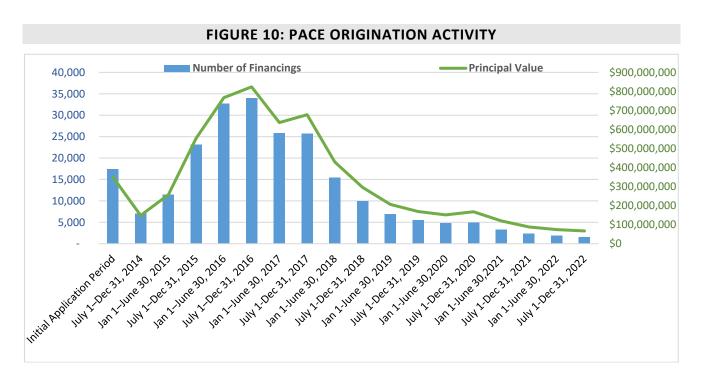

A chart of all Program enrollment activity as of December 31, 2022, can be found in Appendix C.

Claims

In 2021, CAEATFA received two claims from enrolled PACE programs for a total of \$11,585.31, which were paid to the first mortgage lenders pursuant to program regulations. There were no claims in 2022.

Program Impact and Results

After the Program's launch, residential PACE saw a significant increase in origination activity, with residential PACE administrators offering PACE financing in most counties in California. Figure 10, below, shows the initial growth of the enrolled portfolio of PACE financings in the Loss Reserve.

As the residential PACE market matured and became widely available throughout the state, legislation in 2016 and 2017 established consumer protection requirements, minimum underwriting (including ability-to-pay) criteria, and regulatory oversight of PACE under the California Department of Financial Protection and Innovation (DFPI), formerly the Department of Business Oversight (DBO). New PACE originations decreased considerably from the 2016 peak, and a more gradual downward trend continued after 2020. Federal mortgage forbearance during the COVID-19 pandemic and subsequent state mortgage relief efforts appear to have helped keep foreclosure rates lower than pre-pandemic levels, which in turn means fewer potential claims on the Loss Reserve.

The Loss Reserve covers PACE financings for energy and water efficiency improvements, electric vehicle charging infrastructure, and clean energy improvements. Table 7, below, details the estimated environmental savings from enrolled financings as of last reporting by each PACE program administrator.

TABLE 7: ESTIMATED ENVIRONMENTAL SAVINGS FROM ENROLLED PACE FINANCINGS

BOND FINANCING ACTIVITIES

Program Summary

CAEATFA has served as one of the State's primary alternative energy bond issuers since its inception in the 1980s. As a conduit bond issuer, CAEATFA has worked with both public and private entities in issuing over \$212 million in bond financing for 26 projects over its lifetime. The projects help to meet federal and state energy goals, and have included solar, hydroelectric, geothermal, biomass and cogeneration projects. A list of CAEATFA's outstanding bonds can be found in Table 8.

Most recently, CAEATFA successfully issued Qualified Energy Conservation Bonds to assist in the financing of a public utility's one megawatt (MW) solar project in San Diego (2010), and Clean Renewable Energy Bonds on behalf of the California Department of Transportation to install solar on approximately 70 of its properties across the state anticipated to save taxpayers \$52.5 million in energy costs.

The financial assistance and incentives that CAEATFA can provide as a conduit bond issuer are authorized by Federal statute and programs. CAEATFA did not have any new bond issuances in 2022.

CAEATFA continues to collaborate with stakeholders to discuss innovative approaches to meet the financing gaps for renewable energy and energy efficiency projects.

Outstanding Bonds

The Authority had two outstanding bond issues in 2022, amounting to a combined total of \$3,465,132 in bond debt as of December 31, 2022.

TABLE 8: OUTSTANDING BONDS

REPORT OF AUTHORITY'S FINANCES

This report of the Authority's finances is submitted pursuant to Public Resources Code Section 26017.

Revenues and Expenditures – FY 2021-22

The Authority's total revenues for fiscal year 2021-22 were \$3,859,791 and the total expenditures were \$4,497,000.

TABLE 9: REVENUES AND EXPENDITURES - FY 2020-21

Total Revenues ²⁰ :	\$3,859,791
Expenditures:	
Salaries and Wages	\$1,768,000
Staff Benefits	\$948,000
Operating Expenses and Equipment	\$1,781,000
Total Expenditures ²¹	\$4,497,000

Projected Needs and Requirements - FY 2022-23; FY 2023-24

The Authority anticipates it has the financial needs and requirements identified in Table 10 for the 2022-23 and 2023-24 fiscal years.

TABLE 10: PROJECTED NEEDS AND REQUIREMENTS²² - FY 2022-23; FY 2023-24

	FY 2022-23	FY 2023-24
Total Salaries and Wages	\$3,549,000	\$3,542,000
Staff Benefits	\$1,214,000	\$1,219,000
Total Operating Expenses and Equipment	\$4,060,000	\$3,603,000
Total Projected Needs and Requirements	\$8,823,000	\$8,364,000

²⁰ Total revenues include fees collected from the STE and Bond Programs. Total revenues listed do not include reimbursements received from the IOUs to cover costs associated with CAEATFA's administration of the CHEEF.

²¹ Total expenditures include expenditures associated with all of CAEATFA's programs, including the administration of the CHEEF.

²² The values in this Section are as reported in the <u>Governor's Proposed Budget for the 2023-24 fiscal year</u>.

¹ Under the Program the value of a specific project's sales and use tax exclusion is calculated using the statewide sales and use tax everage. The statewide average was estimated at 9.1% through June 2011 and changed to 8.1% in July 2011, 8.37% in January 2013, 8.42% in March 2014, 8.36% in January 2018, and 8.5% in October 2020.

² These benefits are estimates that are calculated under the Program's evaluation system at the time of Board approval. Applicants are required to provide annual reports to CAEATFA on actual project activity.

¹ Under the Program the value of a specific project's sales and use tax exclusion is calculated using the statewide sales and use tax average. The statewide average was estimated at 9.1% through June 2011 and changed to 8.1% in July 2011, 8.37% in January 2013, 8.42% in March 2014, 8.36% in January 2018, and 8.5% in October 2020.

² These benefits are estimates that are calculated under the Program's evaluation system at the time of Board approval. Applicants are required to provide annual reports to CAEATFA on actual project activity.

APPENDIX B: STE APPLICATIONS RECEIVED FOR CONSIDERATION IN 2022

Appendix B: Sales and Use Tax Exclusion Applications Received for Consideration in 2022

	Applicant Name	Project Location	Eligibility Pathway	Qualified Property Amount	Estimated STE Amount	Status
1	BHE Renewables, LLC and its subsidiaries Magma Power Company, BHER Minerals, LLC, and CE Generation, LLC	Calipatria (Imperial)	Advanced Transportation	\$21,434,530	\$1,821,935	Approved June 2022
2	Mitra Future Technologies, Inc.	Mountain View (Santa Clara)	Advanced Transportation	\$5,484,877	\$466,215	Approved June 2022
3	Heraeus Precious Metals North America LLC	Santa Fe Springs (Los Angeles)	Advanced Manufacturing	\$15,900,000	\$1,351,500	Approved June 2022
4	Swift Solar, Inc.	San Carlos (San Mateo)	Advanced Manufacturing	\$8,490,000	\$721,650	Approved June 2022
5	Blue Mountain Electric Company	Wilseyville (Calaveras)	Alternative Source	\$17,030,696	\$1,447,609	Approved June 2022
6	California Safe Soil, LLC	McClellan (Sacramento)	Recycling	\$23,089,719	\$1,962,626	Approved June 2022
7	Aemetis Advanced Fuels Keyes, Inc.	Ceres (Stanislaus)	Alternative Source	\$22,703,169	\$1,929,769	Approved June 2022
8	Touchstone Pistachio Company, LLC	Terra Bella (Tulare)	Advanced Manufacturing	\$23,400,000	\$1,989,000	Approved June 2022
9	Quidel Corporation	Carlsbad (San Diego)	Advanced Manufacturing	\$23,150,000	\$1,967,750	Approved June 2022
10	Lam Research Corporation	Fremont (Alameda)	Advanced Manufacturing	\$23,500,000	\$1,997,500	Approved June 2022
11	Califia Farms, LLC	Bakersfield (Kern)	Advanced Manufacturing	\$23,500,000	\$1,997,500	Approved June 2022
12	Terray Therapeutics, Inc.	Monrovia (Los Angeles)	Advanced Manufacturing	\$16,971,115	\$1,442,545	Approved June 2022

Appendix B: Sales and Use Tax Exclusion Applications Received for Consideration in 2022

	Applicant Name	Project Location	Eligibility Pathway	Qualified Property Amount	Estimated STE Amount	Status
13	Best Express Foods, Inc.	Stockton (San Joaquin)	Advanced Manufacturing	\$6,795,730	\$577,637	Approved June 2022
14	Paradigm Packaging West, LLC	Rancho Cucamonga (San Bernardino)	Advanced Manufacturing	\$8,354,110	\$710,099	Approved June 2022
15	BHE Renewables, LLC and its subsidiaries Magma Power Company and CE Generation, LLC	Calipatria (Imperial)	Alternative Source	\$188,422,290	\$16,015,895	Approved June 2022
16	Ampaire Inc.	Hawthorne (Los Angeles)	Advanced Transportation	\$29,889,143	\$2,540,577	Approved June 2022
17	Trojan Battery Company, LLC	Santa Fe Springs (Los Angeles)	Advanced Manufacturing	\$36,566,109	\$3,108,119	Approved June 2022
18	Archer Aviation, Inc.	Palo Alto (Santa Clara)	Advanced Manufacturing	\$44,360,877	\$3,770,675	Approved June 2022
19	National Carbon Technologies California, LLC	Williams (Colusa)	Alternative Source	\$123,720,000	\$10,516,200	Approved June 2022
20	Phillips 66 Company	Rodeo (Contra Costa)	Alternative Source	\$235,294,118	\$20,000,000	Approved June 2022
21	CASS, Inc.	Oakland (Alameda)	Recycling	\$35,000,000	\$2,975,000	Approved June 2022
22	QuantumScape Corporation	San Jose (Santa Clara)	Advanced Manufacturing	\$114,844,599	\$9,761,791	Approved June 2022
23	Sugar Valley Energy, LLC	Brawley (Imperial)	Advanced Manufacturing	\$235,294,118	\$20,000,000	Approved June 2022
24	West Coast Waste Co., Inc.	Fresno (Fresno)	Alternative Source	\$83,990,000	\$7,139,150	Approved August 2022

Appendix B: Sales and Use Tax Exclusion Applications Received for Consideration in 2022

	Applicant Name	Project Location	Eligibility Pathway	Qualified Property Amount	Estimated STE Amount	Status
25	EnergySource Minerals LLC	Calipatria (Imperial)	Advanced Manufacturing	\$187,000,000	\$15,895,000	Approved December 2022
26	Bloom Energy Corp.	Fremont (Alameda)	Advanced Manufacturing	\$53,831,894	\$4,575,711	Was waitlisted, no funding became available during year. Waitlist expired at end of year
27	Relativity Space, Inc.	Long Beach (Los Angeles)	Advanced Manufacturing	\$171,213,378	\$14,553,137	Was waitlisted, no funding became available during year. Waitlist expired at end of year
28	Tesoro Refining & Marketing Company, LLC	Martinez (Contra Costa)	Alternative Source	\$131,680,092	\$11,192,808	Was waitlisted, no funding became available during year. Waitlist expired at end of year
29	PreZero US Services, LLC	Glen Avon (Riverside)	Recycling	\$50,196,200	\$4,266,677	Was waitlisted, no funding became available during year. Waitlist expired at end of year
30	Element Resources Inc.	National City (San Diego)	Alternative Source	\$64,140,400	\$5,451,934	Was waitlisted, no funding became available during year. Waitlist expired at end of year
31	Space Exploration Technologies Corp.	Hawthorne (Los Angeles)	Advanced Manufacturing	\$235,294,116	\$20,000,000	Was waitlisted, no funding became available during year. Waitlist expired at end of year
