

GoGreen Home Energy Financing Program

Monthly Data Summary through December 31, 2025

Background

This report is produced on a monthly basis to supplement [CHEEF's quarterly reports](#) and provide the most recent data on the progress of the GoGreen Home Energy Financing Program (GoGreen Home). To learn more about GoGreen Home, please visit GoGreenFinancing.com. Values for some figures, particularly dollar amounts, are rounded to the nearest thousand or million.

Standard Loan Reporting

Reporting for standard GoGreen Home loans enrolled through the eight participating credit union lenders.

Private Capital Leveraged

Total Amount Financed: \$348.80 million
Total Loan Loss Reserve Contributions: \$29.95 million¹
For every \$1 of credit enhancement allocated, \$11.65 in private capital is leveraged. ²

¹ This amount reflects a running total of loss reserve account contributions for standard loans as they have been enrolled. The total amount of credit enhancement funds currently encumbered for standard loans is \$23,757,281.87, of which \$21,158,592.14 in contributions came from IOU ratepayer funds. It reflects recaptured funds as loans have paid off and is net of funds paid out as claims on defaults as well as any loan loss reserve contribution adjustments for previous month(s).

² GoGreen Home uses a credit enhancement in the form of a Loan Loss Reserve to leverage private capital at reduced rates and extended term lengths for borrowers.

³ Represents the percentage increase or decrease between total enrolled loans in specified time periods.

⁴ Date of inception is marked by the first loan enrollment in GoGreen Home, July 2016.

Charged off: 209 Loans	\$3,327,850
Claims Paid	\$2,444,151
Recoveries ⁹	\$133,438
Net CE Funds Expended ¹⁰	\$2,310,713

⁵ Some properties are served by more than one IOU, meaning the total number of loans enrolled and total loan principal per IOU will not match the total number of loans enrolled. Loans enrolled per IOU are reported regardless of what measures are installed.

⁶ At their discretion, lenders may include measures in the loan (e.g., solar attic fans) that are not claim-eligible, and that portion of the financing does not receive a credit enhancement. Therefore, the actual claim-eligible amounts are slightly less than the total amounts presented here.

⁷ Reflects the outstanding, unpaid principal balance for the 11,815 loans, based on latest monthly report from the participating lenders to CAEATFA.

⁸ Reflects the number of loans that are no longer covered by LLR due to the lender's departure from the program, resulting in a forfeiture of the awarded LLR. The amount represents the total loan principal of the loans.

⁹ Recoveries reimbursed to GoGreen Home from participating lenders.

¹⁰ Net credit enhancement (CE) funds expended is calculated as Claims Paid less Recoveries.

GoGreen Home Borrower Credit Scores and Interest Rates (All Time)

How GoGreen Home Makes Financing Feasible

Access to Credit: Loans Enrolled to Borrowers with 580-700 Credit Score

Lenders typically require borrowers to have a minimum credit score of around 700 for unsecured loans of any significant value. Through GoGreen Home, lenders are able to approve loans for borrowers with credit scores as low as 580.

41 <i>December 2025</i>	1,492 <i>All Time</i>
-----------------------------------	---------------------------------

Affordable Monthly Payments: Loans Enrolled to Borrowers with Term Lengths >5 Years

The vast majority of lenders typically offer a maximum term length of 5 years for unsecured loans. Through GoGreen Home, lenders are able to extend terms out to 15 years, which significantly lowers monthly payments for borrowers.

588 <i>December 2025</i>	10,521 <i>All Time</i>
------------------------------------	----------------------------------

Access to Capital: Loans Enrolled to Borrowers with Total Financed Amount >\$25,000

Sufficient access to capital is needed for deeper energy retrofits. While lenders typically limit unsecured loans to about \$25,000, most lenders are able to offer up to \$50,000 for all borrowers through GoGreen Home.

¹² These charts compare actual interest rates between GoGreen Home loans and the interest rates of equivalent non-GoGreen Home signature products offered by the Program's participating lenders (as reported by the lenders to CAEATFA), using a data set for loans with terms up to 60 months for borrowers who would have qualified for non-GoGreen Home loans.

¹³ This chart compares monthly payments between GoGreen Home loans with terms greater than 60 months and what monthly payments would have been if the borrower had used the same lender's non-GoGreen Home signature product limiting them to shorter term lengths. Loans from one participating lender who currently offers signature products with terms greater than 60 months are excluded from this comparison. Signature product terms from participating lenders are updated quarterly.

¹⁴ Low-to-Moderate Income (LMI) census tracts, for the purpose of this reporting and providing a 20% loss reserve contribution for the lender, includes tracts with median income that falls below 120% of the Area Median Income (AMI). 59% of loans have been made to properties in LMI census tracts and 56% of total loan capital has gone to properties in LMI census tracts.

¹⁵ CalEnviroScreen is a pollution burden mapping tool that uses environmental, health, and socioeconomic data to produce scores for every census tract in California; CAEATFA is reporting loans for properties in tracts scoring in the highest quartile (75-100%) as loans for projects in disadvantaged communities (DACs). This data uses the most recent version of CalEnviroScreen available at the time of publication.

Marketplace Microloan Reporting

This section reports on microloans enrolled through IOU online marketplaces operated by platform provider Enervee. Microloans, per GoGreen Home regulations, are limited to \$5,000; the marketplace microloans offered on Enervee’s platforms under the Eco Financing brand are reported on separately so as not to skew data presented for full-size loans in other sections. Prior to June 2022, all enrolled Eco Financing marketplace microloans were issued by One Finance for products purchased by SoCalGas customers through the utility’s marketplace. One Finance offered a 60-month term length and a single interest rate of 9.82% to all borrowers. In June 2023, Lewis and Clark Bank re-launched the Eco Financing marketplace microloan offer for the SoCalGas marketplace and launched an Eco Financing microloan product for Enervee’s California Marketplace. The new microloans are approved for up to 60 months with a 9.99% interest rate for customers who opt for auto-pay.²⁰

²⁰ The 9.99% interest rate is for customers who enroll in autopay. Without autopay enrollment, the interest rate is GoGreen Home’s max allowable rate of the 10-year Treasury bonds plus seven hundred fifty (750) basis points as of the first day of the applicable calendar quarter. For loans enrolled in December, this was 11.31%.

²¹ Due to the departure from the program, active microloans belonging to One Finance by the end of October 2024 have been forgiven and are considered paid in full. These 132 microloans held a total outstanding balance of \$82,389.79.

²² Reflects the outstanding, unpaid principal balance for the 1,451 marketplace microloans, as reported to CAEATFA.

²³ To date, 531 claims have been paid for charged-off marketplace microloans.
