¹ California Government Code Section 8855(i) states that the issuer of any proposed debt issue of state and local government shall, no later than 30 days prior to the sale of any debt issue, submit a report of proposed issuance to the commission by any method approved by the commission.

² California Government Code Section 8855(j) states that the issuer of any debt issue of state or local government, not later than 21 days after the sale of the debt, shall submit a report of final sale to the commission by any method approved by the commission.

Top Municipal Market Financing Team Participants: Quarters 1 & 2 of 2018

PARTICIPANTS MAINTAIN RESPECTIVE MARKET SHARES AS OVERALL VOLUME PLUMMETS

Jeff Field
Data Collection and Analysis Unit

Overall debt issuance by California state and local agencies dropped sharply in the first half of calendar year 2018. The approximately \$26.1 billion of long- and short-term debt issued marked a 37 percent decrease from the same period in 2017.¹ The decrease in California was steeper than that shown nationwide, where volume was down 19.5 percent.²

BOND COUNSELS

In 2018, issuance of Property Assessed Clean Energy (PACE³) bonds in California has decreased by a percentage roughly equivalent to the decline for all debt issuance, but the low principal, high frequency structure of PACE issuance still generates well over a thousand debt issuance reports annually. Best Best & Krieger (BBK) served as bond counsel to PACE programs in Riverside and San Bernardino counties whose issuance took off in 2013, making BBK by far the lead-

ing bond counsel firm that year when measured by number of deals. BBK occupied the top spot until the middle of 2016, when it was supplanted by Jones Hall, who by that time had begun to serve as bond counsel for the PACE programs of the California Statewide Communities Development Authority (CSCDA) as well as the County of Los Angeles.

In quarters 1 and 2 (Q1 & Q2) of 2018, Jones Hall maintained its lead over BBK as California's top bond counsel firm ranked by number of deals. Jones Hall was responsible for 30.4 percent of deals that used a bond counsel. Best Best & Krieger, still a very active PACE participant, ranked second with 20.7 percent of the deals. Orrick Herrington & Sutcliffe, Stradling Yocca Carlson & Rauth, and Norton Rose Fulbright US LLP rounded out the top five firms for the first half of calendar 2018 on a deal basis. (Figure 1). Norton Rose Fulbright supplanted Quint & Thimmig LLP for the fifth spot, otherwise the firm rankings remained unchanged from 2017.

Ranking of bond counsel firms by par amount issued produced an entirely different result. Orrick was by far the leading firm in California. In fact, deals on which Orrick was bond counsel accounted for \$13.3 billion, more than six times the amount of the second ranking firm, Stradling Yocca Carlson & Rauth. Jones Hall, Nixon Peabody LLP, and Norton Rose Fulbright US LLP placed third, fourth and fifth, respectively. BBK dropped

back to 11th based on par value. Bond counsels participated in 95.3 percent of the reported financings in California during the first half of 2018, down from the 98.1 percent during the same period in 2017.

FINANCIAL ADVISORS

The top five financial advisors similarly showed most of the same entries as for the first half of 2017, although there was more movement among their respective positions. By deal count, California's leading financial advisory firm for Q1 & Q2 was again The PFM Group/Public Financial Management, Inc. (PFM). PFM continued to hold the top spot despite serving on only 180 deals, down from 333 for the same period in 2017. PFM acts as the financial advisor for the PACE program in Riverside County, which constituted 79 percent of the deals in which they participated. Fieldman Rolapp & Associates, Urban Futures Inc. /Isom Advisors, and KNN Public Finance ranked second, third and fourth respectively (Figure 2). These same three firms ranked fourth, second and third in 2017. Montague DeRose & Associates LLC occupied the fifth spot on a number of deals basis for Q1 & Q2 of 2018.

When measured by volume issued, Public Resources Advisory Group (PRAG) was California's top financial advisory firm, participating in 16 deals with a total par amount of \$7.8 billion. PFM, KNN, Fieldman Rolapp, and MUFG Project Finance complete the top five on a par amount basis.

¹ California issuance numbers include all debt reported to CDIAC as of June 30, 2018 pursuant to CA Govt. Code §8855(j), including long-term and short-term financings and private placements.

NO FINANCIAL ADVISOR REPORTED	580	\$6,304,381,632			NO FINANCIAL ADVISOR REPORTED	519	\$2,289,081,886		

Based on number of deals, financial advisors participated in 51.8 percent of the reported public debt issuance during Q1 & Q2 of 2018, down from 59.8 percent from the same period of 2017. Based upon par amount issued, financial advisory firms participated in 91.2 percent of the debt issued in the first half of 2018. This represented a 6.4 percent increase from 2017.

UNDERWRITERS

Stifel Nicolaus & Company, Inc. (Stifel) and RBC Capital Markets remained California's top under-

writing firms for Q1 & Q2 of 2018 as measured by number of deals, with 71 and 42 deals respectively. Stifel and RBC together underwrote 35 percent more deals as the remaining three of the top five firms combined. Those are Morgan Stanley & Co., Raymond James & Associates, and Bank of America Merrill Lynch (Figure 3).

Morgan Stanley eclipsed all other underwriting firms on a par value basis by purchasing 24 percent, or approximately \$5.3 billion, of California's debt involving an underwriter. From January through June of 2017, un-

derwriters purchased 85 percent of the state's municipal offerings by par amount.⁴ No participation by an underwriter was reported on 731 deals totaling approximately \$3.9 billion in par value.

CDIAC relies on the accuracy of the information submitted on the Report of Final Sale to analyze market trends for California public issuers. Most of the information noted above can be accessed through the California State Treasurer's online data portal DebtWatch, at www.debtwatch.treasurer.ca.gov.

⁴ Banks or other entities purchased the debt not purchased by underwriters. In these sales, there was no firm identified as an underwriter on the Report of Final Sale submitted to CDIAC.

Annual Debt Transparency Report Summary for Fiscal Year 2016-17

Joyce Ward
Technical Assistance Section

On January 1, 2017, SB 1029 (Chapter 307, Statutes of 2016) added section 8855(k) to the Government Code. The new law requires issuers of public debt in California, who submitted a report of final sale (RFS) to the California Debt and Investment Advisory Commission (CDIAC) on or after January 21, 2017 to submit an annual report on the status of that debt until the debt is no longer outstanding and all proceeds have been fully spent.¹ The report must be filed with CDIAC no later than seven months after the end of the reporting period, defined as July 1st through June 30th. Due to the effective date of the new law, the initial reporting period was truncated. Reports for this initial period, Fiscal Year (FY) 2016-17, were due to CDIAC no later than January 31, 2018.

To assist issuers with complying with the new statute and to standardize data, CDIAC developed the Annual Debt Transparency Report (ADTR) to capture the newly required data. There are three categories of information required to be submitted:

1. DEBT AUTHORIZATION – at the beginning, during and at the end of the reporting period;
2. DEBT OUTSTANDING – at the beginning, during and at the end of the reporting period; and
3. USE OF PROCEEDS – proceeds available at the beginning of the reporting period, spent during the reporting period, and remaining at the end of the reporting period.

FIGURE 1
PROFILE OF ISSUERS, ADTR REPORTABLE ISSUES, FY 2016-17

Housing Authority	11	0.5	11	100.0
Nonprofit Public Benefit Corporation	10	0.5	10	100.0
Utility District	4	0.2	4	100.0
TOTALS	2,049		1,125	

Since 1984, CDIAC has captured debt issuance data at two points, prior to issuance and after the sale of the debt. Issuers of debt under the Mello-Roos and Marks-Roos statutes have been required to submit annual updates on the status of that debt since January 1, 1993 and January 1, 1996, respectively.² With the passage of SB 1029, all of California's public issuers must now submit annual reports on the status of their debt.

COMPLIANCE – CDIAC identified 2,049 issues as reportable for the initial reporting period.³ As of June 30, 2018, 1,125 ADTRs have been received, 55 percent (55%) of the reportable issues. Of the reports received, 715 (63.6 percent) were filed on-time with the remaining 410 reports filed after the end of the statutory filing deadline, January 31, 2018.

Joint powers authorities (JPAs) comprised the largest percentage of issuers required to report, with 840 issues. K-12 school districts and counties were second and third with 342 and 319 issues, respectively.

When compliance is considered, the State of California submitted 100 percent of the expected reports, 158.⁴ Counties and JPAs, two of the most frequent issuers, showed the lowest level of compliance with 6.6 and 36.3 percent, respectively. (Figure 1)

When these issuers were contacted to determine the reason for non-submittal, CDIAC staff learned that many participate in the issuance of PACE debt and have limited available staff capacity to devote to the completion of the report.⁵ PACE debt issuance resulted in 968 identified ADTR reportable

¹ Government Code Section 8855(j) requires issuers to submit a report of final sale to CDIAC no later than 21 days after the sale of any debt.

² Government Codes Sections 53359.5(b) and 6599.1(b), respectively.

³ For purposes of ADTR submission, an issue is any transaction or portion of a transaction for which a CDIAC number was generated.

⁴ The State of California includes reports for the issuance of state general obligation bonds and commercial paper in support of the general obligation bond program.

⁵ The Property Assessed Clean Energy (PACE) program is authorized under Streets and Highways Code §5898.20.

issues. Figure 2 shows the total reportable issues and compliance rate by debt type.

DEBT AUTHORIZED – Unlike the two other categories of reporting required by SB 1029, debt authorization is not issue based - one approved authorization may generate more than one issue and one issue may use one or more authorizations. For example, when voters approve a general obligation bond act or measure, issuers may conduct several financings before the amount approved, or authorized, has been exhausted. Further, the type of authorization to issue debt depends on the type of debt being issued – some authorizations require voter approval, others simply require approval of the legislative body.

Issuers reported that there was approximately \$63.8 billion in debt authorization available for issuance at the beginning of the reporting period, July 1, 2016. Another \$50 billion was added during the period for a total of \$113.8 billion in available debt authorization for the period ending June 30, 2017. During this initial truncated period, \$37.1 billion was used from January through June, 2017. Another \$2.6 billion in authorization lapsed, leaving a balance of approximately \$74 billion in authorization unissued at the end of the reporting period.⁶ (Figure 3)

DEBT OUTSTANDING – The calculation of outstanding debt is based on the amount of debt sold during the reporting period and, unlike debt authorization, is issue based. Since this initial reporting period was shortened, all debt reported to CDIAC from January 21, 2017 through the end of the reporting period is captured as “debt outstanding at the beginning of the reporting period.”

State and local issuers reported \$39.8 billion in outstanding debt at the beginning of this initial reporting period. Since accreted interest is added to debt issued as capital appreciation bonds, thereby increasing the amount of debt that has to be repaid, the amount outstanding was increased by \$347.5 thousand in accreted interest during the reporting period. More than \$580.7 million in principal was repaid and \$16.2 million was redeemed during the period. Figure 4 shows

the debt outstanding at the state and local levels at the end of the period.

USE OF PROCEEDS – To determine the total amount of reportable proceeds available, CDIAC used the total of principal issued plus/minus any original issue premium or discount associated with the issue. In the

case of Marks-Roos financings, where there was one or more local obligors, issuers were permitted to deduct the amount of proceeds from the sale used to acquire a local obligation or transferred to a local obligor projects.⁷ Since local obligors are also required to submit an ADTR on their issues and are

⁶ Lapsed authorization is defined as debt for which the issuing authorization has expired.

more familiar with the status and use of proceeds on their projects, they would be reporting on the use of those proceeds.

The use of proceeds portion of the report was divided into two sections. In the first section, submitters had to establish the fund categories for which the proceeds would be used and amount of proceeds allocated to each category. The total of proceeds established in the fund categories had to equal the total reportable proceeds. In the second section, issuers had to capture how much of each fund was actually spent during the reporting period. The amount spent could not exceed, but could be less than the amount established for each fund category.

In order for funds to be “spent”, the payment had to be made within the reporting period. For example, if an issuer deposited funds into an escrow fund for the purpose of refunding outstanding debt, the holders of that debt must have received their principal and any interest due no later than June 30, 2017. CDIAC required submitters to provide the date of repayment in order to verify that it had occurred within the period.

The total proceeds which had to be accounted for by state and local agencies for this first reporting period was \$42.7 billion (Figure 5).

Although submitters were capable of creating unique “categories” to show how their proceeds were allocated, for the purpose of this report, those categories have been consolidated. For example, construction fund, project fund and building fund have been consolidated into the “Project Fund” category. Categories reported as refunding escrow, bond repayment, and escrow are reported under the “Escrow” fund category. Underwriters discount, management fees, takedown and expenses have been consolidated with other fees reported as “Cost of Issuance” and included in that fund category.

Of the \$42.7 billion in available proceeds, only \$18.9 billion was reported as spent. State agencies reported \$14.5 billion in available proceeds and spent approximate-

GRAND TOTAL	\$39,798.0	\$3,157.6	\$42,955.6	\$277.7	\$42,677.9

ly \$9.4 during the period. Local issuers had \$23.1 billion in reportable proceeds available. Of this amount, almost \$9.5 billion was spent between January and June, 2017. The fund categories for which the proceeds were allocated and spent are shown in Figures 6A and 6B.

Local agencies reported approximately \$28.2 billion in available proceeds. The top ten categories of expenditures are shown in Figure 6B.

K-12 school districts, cities and joint powers authorities (JPAs) were the three largest issuers at the local level and therefore had the greatest amount of proceeds available for use. School districts reported more than \$7.9 billion in available proceeds. They used more than half of it for project funding, almost \$5 billion. Escrow funds to refinance outstanding debt and capitalized interest funds were the next two leading uses of proceeds. Cities

used the majority of the \$3.2 billion in available monies to refund outstanding debt (\$2.2 billion), fund projects (\$961 million), and pay issuance costs. Establishing escrow accounts to refinance debt (\$1.7 billion) fund projects (\$1.1 billion), and establish capitalized interest accounts (\$44 million) were the top three uses of proceeds by JPAs. (Figure 7)

In conclusion, this initial ADTR reporting period was as much as a learning experience for CDIAC staff as it was for submitters. We are continuing to refine and improve the ADTR. We contemplate having a batch process in place for large filers and redesigning the report in an attempt to resolve issues with the authorization section of the report.

We value your opinion and welcome any comments on the contents of this report. Please send your comments to the Data Unit at CDIAC_Issuance@treasurer.ca.gov.

⁷ California Code of Regulations, Title 4, Division 9.6, Chapter 1, Article 1, Section 6050 defines a local obligation the debt of a local obligor and a local obligor as an entity of local government that has issued debt wherein the Joint Powers Authority is the creditor.

Welcome Karen McMillen and Celeste Winterton

CDIAC would like to welcome Karen McMillen and Celeste Winterton to our Continuing Education and Outreach Unit.

KAREN MCMILLEN was appointed manager for the Continuing Education and Outreach Unit in May of 2018. She brings a strong understanding of adult learning principals as well as educational curriculum development, which she gained from her

most recent positions as a trainer and senior trainer at the State Teachers' Retirement System (CalSTRS). She is experienced in both public and private finance due to her time at CalSTRS, as well as a prior position at Franklin Templeton Investments and a degree in managerial economics from the University of California, Davis. She is looking forward to expanding her knowledge of California public debt and investments, as well as using previous experience to help grow CDIAC's already excellent educational programming.

CELESTE WINTERTON was promoted to an analyst in the Continuing Education and Outreach Unit in July of 2018. She started

her career with CDIAC as a student assistant supporting the Data Collection and Analysis Unit while she earned her bachelor's degree in economics from California State University, Sacramento (CSUS). CSUS recognized Celeste with awards for outstanding community engagement, as well as the 2018 Adam Smith Award for best undergraduate research paper in economics. Her education and knowledge of CDIAC, coupled with experience planning events for Simon Property Group make her a valuable addition to the team. Celeste is looking forward to taking the next step in her career in state service, as well as providing a fresh perspective to CDIAC's educational programming.

Both Karen and Celeste will be working to design, organize and present programs for public agency officials and their staffs that are responsible for or involved in the issuance of municipal bonds, administration of bonded debt, or investment of public funds. They are excited to work with CDIAC's partners and stakeholders and hope to meet you at the next CDIAC event you attend.

Organizations may submit information on future educational seminars, meetings, or conferences by contacting emailing cdiac_education@treasurer.ca.gov. Publication of announcements is subject to space limitations.

16 SIFMA announced implementation of a new structure for its Masters Agreement Among Underwriters (MAAU) for negotiated offerings of municipal securities by offering a signature page storage service. Participating firms sign on to the SIFMA MAAU and SIFMA will publish a list of firms that have accepted the terms of the MAAU on its website. The MAAU is a master contract designed to govern the relationships of underwriting syndicate members in municipal securities transactions. This is the first update to the MAAU in 16 years. [Additional Information.](#)

27 Comment deadline on the Municipal Securities Rulemaking Board (MSRB) draft of Frequently Asked Questions Regarding MSRB Rule G-40 (advertising by municipal advisors). The MSRB seeks to develop practical compliance assistance for the proposed FAQs. Specifically, comments are sought by market participants on feedback and clarity in understanding, other unidentified concerns about use of a municipal advisory client list or case study for advertisement under Rule G-40, and if the examples in the FAQs Draft are applicable and realistic to the market. [Additional Information.](#)

AUGUST 2018

6 Deadline for comments on MSRB's interpretive guidance issued for Rule G-17, *Conduct of Municipal Securities and Municipal Advisory Activities*. MSRB seeks comments regarding the benefits, burdens of, and possible alternatives to its 2012 Guidance on G-17 to determine its effectiveness and/or if amendments are needed. [Additional Information.](#)

SEPTEMBER 2018

4 Implementation of SIFMA's updated MAUA. The new MAUA structure is intended to facilitate transparency for broker dealers who have accepted, or agreed to adhere to the MAUA and to reduce compliance burdens on firms who will no longer need to execute and store signature pages for every syndicate member. [Additional Information.](#) **DL**
