

# **California Health Facilities Financing Authority Community Services Infrastructure Grant Program (SB 843)**

## **Report to the Legislature – March 2020**

### **Background**

Chapter 33 of the Statutes of 2016 (SB 843), Section 52 established the Community Services Infrastructure Grant Program (CSI Grant Program), a one-time competitive grant program intended to create and expand community alternatives to incarceration. The CSI Grant Program seeks to expand access to jail and prison diversion programs and services for those with mental health illness, substance use disorders, or who have suffered from trauma through the creation or expansion of mental health treatment facilities, substance use disorder treatment facilities, and trauma-centered service facilities for justice-involved individuals in local communities.

The CSI Grant Program grants funds to counties for infrastructure projects, including facility acquisition, renovation, equipment acquisition, and applicable startup or expansion costs. The California Health Facilities Financing Authority (Authority) was assigned the responsibility for developing the program as well as awarding and administering the grants.

### **Program Funding**

The CSI Grant Program was initially allocated funding in the enacted 2016-17 budget (SB 826). This allocation included a one-time General Fund appropriation of \$67,500,000, of which \$1,687,000 was allocated for administrative costs.

The Authority temporarily postponed the development of the program pending resolution of funding availability after it was notified that the Governor's proposed 2017-18 budget recommended reverting the \$67,500,000 appropriation allocated from the General Fund in the 2016-17 budget.

The enacted 2017-18 budget (AB 97) restored funding for the CSI Grant Program, re-allocating \$67,500,000 in a one-time General Fund appropriation, including \$1,687,000 for administrative costs. According to AB 97, all funds must be encumbered by June 30, 2020, and funds must be fully disbursed by June 30, 2022; therefore, projects must also be operational by June 30, 2022.

### **Program Development**

Authority staff began working on the structure and development of the program shortly after the 2017-18 budget was approved in June 2017. Authority staff worked closely with the Authority's technical advisor, the California Institute for Behavioral Health Solutions, and consulted with several stakeholders, including the Council on Criminal Justice and Behavioral Health, the California Department of Corrections and Rehabilitation, the County Behavioral Health Directors Association of California, the Council of State Governments Justice Center, the Board of State and Community Corrections, California State Senate and Assembly legislative staff, the San Francisco District Attorney's Office and various county behavioral health departments.

On August 15, 2018, Authority staff presented a webinar to approximately 100 interested stakeholders, providing an overview of the CSI Grant Program and the proposed regulations, and giving stakeholders the opportunity for input and feedback on the regulations.

The Authority developed emergency regulations that were approved by the Office of Administrative Law on November 15, 2018, and permanent regulations became effective on October 3, 2019.

The Authority held two rounds where counties had the opportunity to apply for CSI Grant funding. The first funding round opened on November 30, 2018, and closed on April 30, 2019. The second funding round opened on June 3, 2019, and closed on December 2, 2019. Authority staff held two informational technical assistance webinars, on December 13, 2018, and October 30, 2019, providing an overview of the program and specifics regarding the preparation of an application.

### **Summary of Grant Awards**

After the completion of two funding rounds, the Authority approved 17 CSI Grant awards for the benefit of 12 counties and for new programs and services serving an average of approximately 2,910 justice-involved individuals annually. Grant awards totaling \$65,813,000 have been encumbered with no additional funds available for subsequent funding rounds.

During the first funding round, the Authority received 10 applications, and on July 25, 2019, the Authority's board awarded \$18,190,823.55 for eight projects in eight counties. One of the eight counties forfeited its grant award in the amount of \$569,940, and those funds were made available in the second funding round.

During the second funding round, the Authority received 12 applications, and on March 26, 2020, the Authority's board awarded \$48,191,116.45 for nine projects in eight counties.

Exhibit A provides a detailed summary of the awards approved by the Authority with a description of the projects funded for each county, the amount of each grant awarded, a description of other funding sources, and the target population to be served by the counties.

### **Next Steps**

Authority Staff will be conducting a "Next Steps" webinar for grantees in Spring 2020 to provide an overview of the disbursement process and the reporting requirements. In addition, the Authority will work closely with each county that received a grant award to ensure the timely completion of projects and that all funds are disbursed before the grant expiration date of June 30, 2022.

All funding for the CSI program has been encumbered.
