

CHILDREN'S HOSPITAL PROGRAM OF 2004 2020 ANNUAL REPORT

PROGRAM OVERVIEW

On November 2, 2004, California voters passed Proposition 61, enabling the State of California to issue \$750 million in General Obligation bonds for the Children's Hospital Program. Under California Health and Safety Code, Sections 1179.10-1179.43, the purpose of the program is to improve the health and welfare of California's critically ill children, by providing a stable and ready source of funds for capital improvement projects for children's hospitals. The California Health Facilities Financing Authority (CHFFA) is responsible for administering the program.

Language in Proposition 61 identifies 13 children's hospitals in California as eligible for funding and sets funding maximums for each hospital. The 13 children's hospitals consist of eight private nonprofit children's hospitals and five University of California children's hospitals. Grant awards for private nonprofit children's hospitals were limited to \$74 million, less costs of issuance. Grant awards for University of California children's hospitals were limited to \$30 million, less costs of issuance and administrative costs. Costs of issuance are \$0.75 per \$1,000 of the authorized grant award, and administrative costs are \$5.00 per \$1,000 of the authorized grant award.

All 13 children's hospitals under the Children's Hospital Program of 2004 have been fully awarded and received their first and second funding round grant maximums. Loma Linda University Children's Hospital is the only hospital that still has a construction project in progress. Staff routinely monitors this project through a variety of methods including site visits, emails, telephone calls, disbursement requests, news reports, and construction web cams.

A total of \$8,197,013 remained after the 13 children's hospitals were awarded their grant maximums due to accrued interest and the actual costs of administration and bond issuance being less than estimated. As a result, CHFFA developed regulations to open third and fourth funding rounds to disburse all remaining funds to the 13 children's hospitals.

In compliance with the limitations in the statute, University of California children's hospitals were allocated twenty percent (20%) of the total funds available and nonprofit children's hospitals were allocated eighty percent (80%) of the total funds available. Specifically, in the third funding round, which opened October 1, 2017, the total amount of funds available for each University of California children's hospital was set by CHFFA to not exceed one-fifth of the twenty percent (20%) allocated to University of California children's hospitals, and the total amount of funds available for each private nonprofit children's hospital was set by CHFFA to not exceed one-eighth of the eighty percent (80%) allocated to private nonprofit children's hospitals. For the fourth funding round, which opened on July 1, 2018, any remaining funds will be awarded for complete applications on a first-come, first-served basis.

In the third funding round, CHFFA awarded grants to 12 of the 13 children's hospitals, with the University of California, San Diego Children's Hospital being the exception. A remaining balance of \$128,121 is available in the fourth funding round. University of California, San Diego Children's Hospital has indicated that it plans to apply for the balance of the funds in the fourth funding round.

A detailed summary of the Children’s Hospital Program of 2004, entailing information on funding rounds, amounts allotted by statute and regulations, the amounts disbursed, and any remaining grant funding per hospital is provided below.
