**Project:** Renovate and expand an existing facility to develop a dental clinic with eleven operatories of which three are new dental operatories

**Summary of Project:**

The University of Southern California, Herman Ostrow School of Dentistry (Grantee) plans to renovate an existing dental clinic by adding additional square footage and remodeling the interior. The renovated dental clinic, having three new dental operatories and eight remodeled dental operatories, in Los Angeles County will provide dental services for adult special health care needs patients, who have disabilities that prevent them from receiving routine or specialty care due to their physical, developmental, or cognitive condition. The renovations and the new equipment, such as a bariatric dental chair and wheelchair lift, will optimize space and improve accessibility. Additionally, the Grantee provides dental students with a hands-on learning experience, fostering the growth of a more skilled dental workforce capable of serving patients with special health care needs. The Grantee anticipates the expanded dental clinic will serve approximately 1,193 special health care needs patients annually. Upon completion of the project, special health care needs patients will constitute 50 percent or more of the total number of patient visits of those receiving dental services in the operatories paid for with grant funds. Grant funds will be used for construction and renovation expenses, and the purchase of equipment and furnishings. Additional leveraged funding will be used to cover expenses that exceed the grant award amount. Staff evaluated the plan and has determined that the project is likely to be feasible and sustainable.
