Re: Designation of Fire-Stricken Areas as Severely Affected Communities

The credit enhancements offered by the Authority for loans enrolled in the California Capital Access Loan Program (CalCAP) for Small Business and Collateral Support Program are eligible for supplemental contributions for borrowers whose businesses are located in a Severely Affected Community. The Authority's regulations define a Severely Affected Community as an "economically distressed geographic area", and is measured as an area where the unemployment rate of the city or county is 110% of the state unemployment average or more, based on data published monthly by the Employment Development Department. The regulations also authorize the Executive Director to designate other comparably distressed areas from time to time. (See 2 CCR Section 8070(y).)

The Governor has declared a state of emergency for additional counties due to the effects of the devastating fires burning across California. Therefore, I have determined that it is proper to authorize any eligible small business based in any of these counties to be deemed as located in a Severely Affected Community, and that any loan made to these businesses and enrolled in CalCAP for Small Business or the Collateral Support Program shall be eligible for the supplemental credit enhancement. All the counties designated as Severely Affected Communities due to a state of emergency declaration are listed on the chart below, effective as of the declaration date and in effect until the end date listed.

Table with 3 columns: Date of Declaration, Counties, End Dates for SAC. Rows include dates from October 2017 to November 2018 and corresponding counties and end dates.
