RE: 2026 Threshold Basis Limits

In 2008, the California Tax Credit Allocation Committee (CTCAC) implemented a threshold basis limit system utilizing county and regional cost data. This data, obtained from the CTCAC database, consists of new construction projects that have been awarded tax credits. CTCAC is releasing 2026 threshold basis limits using an updated data set, and the following summarizes steps taken to update this data.

In updating the limits each year, CTCAC adds newly awarded projects to the data set and deletes the oldest year of project data. CTCAC staff has added data for projects receiving 2025 tax credit reservations (both 9% and 4%). Staff uses application estimates for a given project until CTCAC receives a final certified project cost report. Continuing this year, competitive project costs have been updated with interim cost estimates from the 180/194-day application submissions. To more accurately reflect the higher construction costs of recent years, the current data set consists of a five-year period of projects awarded from 2021-2025 and uses a region-level basis limit.

The methodology remains unchanged from last year's. However, the R.S. Means Historical Cost Index and City Cost Indexes showed relative stability in construction costs through 2025 and, as a result, the 2026 cost indexes indicate a modest growth rate compared to prior years in California construction cost data. After factoring in 2025 new construction data along with the 2026 R.S. Means Historical Cost Index and City Cost Indexes construction inflators, the result was a slight increase to the basis limits in some regions for 2026. CTCAC threshold basis limits are restricted to the project data gathered from CTCAC application submissions.
