Cost Analysis and Line Item Review

Staff analysis of project costs to determine reasonableness found all fees to be within TCAC’s underwriting guidelines and TCAC limitations. Annual operating expenses meet the minimum operating expenses established in the Regulations, and the project pro forma shows a positive cash flow from year one. Staff has calculated federal tax credits based on 3.27% of the qualified basis. Applicants are cautioned to consider the expected federal rate when negotiating with investors. TCAC's financial evaluation at project completion will determine the final allocation.

Significant Information / Additional Conditions. None.

Resyndication and Resyndication Transfer Event

Prior to closing, the applicant or its assignee shall obtain TCAC's consent to assign and assume the existing Regulatory Agreement (CA-2001-908). To be eligible for a new award of tax credits, the owner must provide documentation with the Form 8609 request (the placed in service submission) that the acquisition date and the placed in service date both occurred after the existing federal 15 year compliance period was completed.

The newly resyndicated project shall continue to meet the rents and income targeting levels in the existing regulatory agreement(s) and any deeper targeting levels in the new regulatory agreement(s) for the duration of the new regulatory agreement(s). Existing households determined to be income-qualified for purposes of IRC §42 credit during the 15-year compliance period are concurrently income-qualified households for purposes of the extended use agreement. As a result, any household determined to be income qualified at the time of move-in under the existing regulatory agreement (CA-2001-908) is a qualified low-income household for the subsequent allocation (existing household eligibility is “grandfathered”).

The project is a resyndication where the existing regulatory agreement requires service amenities. The project shall provide a similar or greater level of services for a period of at least 15 years under the new regulatory agreement. The project is deemed to have met this requirement based on TCAC staff’s review of the commitment in the application. The services documented in the placed in service package will be reviewed by TCAC staff for compliance with this requirement at the time of the placed in service submission.

The project is a resyndication occurring concurrently with a Transfer Event without distribution of Net Project Equity, and thus is waived from the requirements under TCAC Regulation Section 10320(b)(4)(B).

Local Reviewing Agency
The Local Reviewing Agency, San Diego Housing Commission, has completed a site review of this project and strongly supports this project.

Standard Conditions
If applicant is receiving tax-exempt bond financing from other than CalHFA, the applicant shall apply for a bond allocation from the California Debt Limit Allocation Committee's next scheduled meeting, if not previously granted an allocation; shall have received an allocation from CDLAC; and, shall issue bonds within time limits specified by CDLAC.

The applicant anticipates financing more than 50% of the project aggregate basis with tax-exempt bond proceeds as calculated by the project tax professional. Therefore, the federal credit reserved for this project will not count against the annual ceiling.

The IRS has advised TCAC that the amount of tax-exempt bonds issued, equivalent to at least 50% of aggregate basis, must remain in place through the first year of the credit period or until eligible basis is finally determined.

TCAC makes the preliminary reservation only for the project specified above in the form presented, and involving the parties referred to in the application. No changes in the development team or the project as presented will be permitted without the express approval of TCAC.

The applicant must pay TCAC a reservation fee calculated in accordance with regulation. Additionally, TCAC requires the project owner to pay a monitoring fee before issuance of tax forms.

As project costs are preliminary estimates only, staff recommends that a reservation be made in the amount of federal credit and state credit shown above on condition that the final project costs be supported by itemized lender approved costs and certified costs after the buildings are placed in service.

All unexpended funds in reserve accounts established for the project must remain with the project to be used for the benefit of the property and/or its residents, except for the portion of any accounts funded with deferred developer fees.

All fees charged to the project must be within TCAC limitations. Fees in excess of these limitations will not be considered when determining the amount of credit when the project is placed-in-service.

The applicant/owner shall be subject to underwriting criteria set forth in Section 10327 of the regulations through the final feasibility analysis performed by TCAC at placed-in-service.

Credit awards are contingent upon applicant's acceptance of any revised total project cost, qualified basis and tax credit amount determined by TCAC in its final feasibility analysis.

CDLAC Additional Conditions. None.
