## DESIGNATION BY POOLED MONEY INVESTMENT BOARD OF TREASURY POOLED MONEY INVESTMENTS AND DEPOSITS

1918

In accordance with sections 16480 through 16480.8 of the Government Code (GC), the Pooled Money Investment Board, at its meeting on December 17, 2025, has determined and designated the amount of money available for deposit and investment as of December 12, 2025, under said sections. In accordance with sections 16480.1 and 16480.2 of the GC, it is the intent that the money available for deposit or investment be deposited in bank accounts and savings and loan associations or invested in securities in such a manner so as to realize the maximum return consistent with safe and prudent treasury management, and the Board does hereby designate the amount of money available for deposit in bank accounts, savings and loan associations, and for investment in securities and the type of such deposits and investments as follows:

1. In accordance with Treasurer's Office policy, for deposit in demand bank accounts as:

### a. Compensating Balance for Services

125,000,000

The active noninterest-bearing bank accounts designation constitutes a calendar month average balance. For purposes of computing the compensating balances, the Treasurer shall exclude from the daily balances any amounts contained therein as a result of nondelivery of securities purchased for "cash" for the Pooled Money Investment Account and shall adjust for any deposits not credited by the bank as of the date of deposit. The balances in such accounts may fall below the above amount provided that the balances computed by dividing the sum of daily balances of that calendar month by the number of days in the calendar month reasonably approximates that amount. The balances may exceed this amount during heavy collection periods or in anticipation of large impending warrant presentations to the Treasury, but the balances are to be maintained in such a manner as to realize the maximum return consistent with safe and prudent treasury management.

b. Interest Bearing Accounts for Cash Flow Variability:

#### Introduction and Overview

The State Treasurer's Investment Division manages the Pooled Money Investment Account (PMIA) under statutory authority granted by Government Code sections 16430 and 16480 et. seq. All state money held by the State Treasurer in treasury trust accounts, and all money in the State Treasury, is appropriated for the purpose of investment and deposit.

Through the PMIA, the State Treasurer invests taxpayers' money to help manage the State's cash flow, as well as provide an investment option for local governments through the Local Agency Investment Fund (LAIF). The PMIA's primary investment objectives are safety, liquidity and yield.

The PMIA has three primary sources of funds: the State General Fund; special funds held by State agencies; and moneys deposited by cities, counties, and other local agencies into the LAIF.

The Pooled Money Investment Board (PMIB) governs the PMIA. The State Treasurer chairs the PMIB, which also includes the State Controller and the Director of Finance.

The State Treasurer's Investment Division shall present a written statement of investment policy to the PMIB at a public meeting annually, as well as promptly notify the PMIB of any material change in the statement of investment policy. This document serves as the statement of investment policy.

#### Investment Division Mission Statement

The Investment Division prudently invests the State's and local governments' idle cash through the Pooled Money Investment Account, consistent with the objectives of safety, liquidity, and yield.

#### Investment Division Vision Statement

To provide the highest and most consistent level of service, leadership and accountability through innovation, collaboration, and teamwork, while maintaining investor confidence and trust.

#### Portfolio Management Goals, Objectives, and Policies

The following goals, objectives, and policies shall direct the daily investment decisions in the management of the PMIA:

#### Goal 1. Portfolio Safety/Diversification

The PMIA will be managed to ensure the safety of the portfolio by investing in high credit quality securities and maintaining a mix of securities with various terms that in aggregate provides reasonable protection that no single investment, or class of investments, will have a disproportionate impact on the total portfolio.

<u>OBJECTIVE</u>: In addition to the safety provided by investing in high credit quality securities, the safety of the portfolio is enhanced by maintaining a diverse, prudent mix of investments, and includes:

- 1) Spreading investments over different investment types to minimize the impact that any one industry/investment class can have on the portfolio;
- 2) Spreading investments over multiple credits/issuers within an investment type to minimize the credit exposure of the portfolio to any single firm/institution; and
- 3) Spreading investments over various maturities to minimize the risk of portfolio depreciation due to a rise in interest rates.

<u>POLICY</u>: The portfolio shall contain a sufficient number and diversity of marketable securities so that a reasonable portion of the portfolio can be readily converted to cash without causing a material change in the value of the portfolio. Limitation and eligibility as to specific investments are to be determined by the PMIB in the case of Commercial Paper and the State Treasurer's Investment Division in all other matters.

In the absence of direct statutory limitations, the "prudent person rule" shall govern all investment decisions. Changing market conditions that warrant consideration of significantly modifying investment strategies (e.g. altering credit quality, marketability, yield spreads, securities availability) shall be discussed with the Director of Investments. At the Director of Investments' determination, the situation may be discussed with the State Treasurer or the State Treasurer's designee.

#### Goal 2. Liquidity

The PMIA will be managed to ensure that scheduled and unscheduled cash needs can be met.

<u>OBJECTIVE</u>: The PMIA will maintain a "cash flow generated" portfolio balance sufficient to cover specifically the one-month cash disbursement forecast, as well as generally the six-month disbursement forecast.

<u>POLICY</u>: The first priority is to maintain specific calendar liquidity, as dictated by the most recent cash forecast provided by the Centralized Treasury & Securities Management Division. The second priority is to maintain adequate marketable securities positions to meet the potential risk of unscheduled cash needs arising.

Due to the diverse requirements of cash flow management, an average life of 120 days to 18 months will be maintained.

#### Goal 3. Rate of Return

The PMIA investments and deposits shall be made in such a way as to realize the maximum return consistent with safe and prudent treasury management.

<u>OBJECTIVE</u>: The rate of return will be maintained on a consistent level representative of current high credit quality fixed income market yields.

<u>POLICY</u>: Gains and losses from the sale of securities will not be incurred at levels that would noticeably alter the PMIA's quarterly apportionment rate of return. Significant sales gains will be offset for restructuring purposes to maintain consistent current return, as well as to maximize future portfolio performance. Significant sales losses shall be incurred only with the consent of the State Treasurer, or when sufficient gains from other sales minimize the overall change in the apportionment rate of return.

To protect the portfolio rate of return, long positions shall never exceed the amount intended to be purchased during a "when issued" (W.I.) period, and short positions shall never be taken.

#### **Authorized Investments**

#### Glossary

Agencies (Federal) – Securities issued or guaranteed by U.S. federal government agencies and by government-sponsored enterprises (GSEs)—corporations created by Congress to foster a public purpose, such as affordable housing. Certificates Of Deposit (CD) – Issued by commercial banks and thrift institutions against funds deposited for specified periods of seven days or longer and earn specific rates of interest. Major banks and thrifts also issue variable rate CDs with maturities of up to five years. Variable rates are adjusted every 30, 90, or 180 days, and usually include a fixed spread to the benchmark rate for major bank CDs, as compiled and published by the Federal Reserve Bank of New York. Yankee CDs, also authorized by statute, are U.S. dollar-denominated CDs issued by foreign banks domiciled in the United States.

Commercial Paper (CP) – Short-term discounted obligations with maturities ranging from one to 270 days issued by banks, corporations and limited liability companies. CP can be issued directly or through a broker.

Corporate Bonds/Notes – Debt securities issued by a company to raise capital for their operations or for a specific project.

Foreign Government Bonds/Notes – U.S. dollar denominated bonds issued in a domestic market by a foreign government as a means of raising capital and to pay for services or other obligations.

Most transactions are for maturities from one to three days.

Reverse Repurchases (RRP or Reverse Repo) – Matched sales-purchase agreements that are the opposite of a Repurchase Agreement. In this instance, the investor is the owner of the collateral, and the bank or dealer is the lender of money.

Time Deposits – Interest-bearing deposits with specific maturities negotiated with California banks, savings and loans and credit unions. These deposits are secured by collateral pledged by the financial institution and in compliance with the Government Code. Required collateralization levels are monitored daily. In addition, financial institutions are evaluated for credit quality.

- U.S. Treasury Bills A short-term (maturities up to a year) discounted government security (secured by the full-faith and credit of the U.S. government) sold through competitive bidding at weekly and monthly auctions. One-, three-, four- and six-month bills are auctioned weekly, and one-year bills are auctioned monthly.
- U.S. Treasury Notes Debt obligations of the U.S. government, issued at various schedules (monthly in most cases) and are intermediate securities with maturities from one to 10 years.
- U.S. Treasury Strips Originally issued by the U.S. Treasury in complete form as principal and interest obligations.
